### MOVEMENT OF SUBSTANCES INTO AND OUT OF CELLS

#### DIFFUSION

Diffusion = net movement of particles from high to low concentration  
Diffusion = passive, no energy required, result of random movement  
Concentration gradient = difference in concentration

Increasing diffusion rate = steeper gradient, larger rate cells, small size

#### OSMOSIS

Osmosis = the diffusion of water molecules across partially permeable membrane from high to low concentration (water)

Isotonic = same water concentration in solution on both sides  
Hypertonic = hypertonic solution has higher water concentration  
Hypotonic = hypotonic solution has lower water concentration  
Rough = high internal water pressure, pushes against cell wall of plant cells  
Turgid = plant cell when a vacuole has to the outside movement  
Plasmolysed = when cells lose water through osmosis

#### ACTIVE TRANSPORT

Active transport = when particles move against a concentration gradient  
Energy enters in the cell membrane push up particles and molecules  
The cell membrane against concentration gradient using ATP

#### FACTOALS

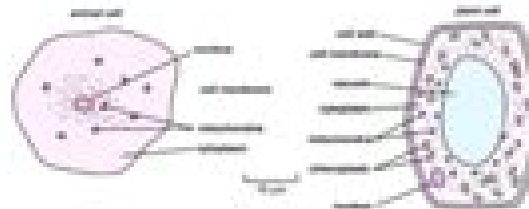

Diffusion

Not living system

Diffusion occurs in all living and non-living systems

### CELL STRUCTURE

#### CELL ORGANELLES

Organelles = subcellular structures in cells

#### Cytoplasm

Where chemical reactions take place

Living, jelly-like material, supports organelles

Contains enzymes, water and solutes

#### Nucleus

Contains genetic information of a cell

Enclosed in a nuclear membrane, contains chromosomes

Control the activity in cells by determining the proteins produced

## Level 9 achieved!

### THE ORGANISM IN THE ENVIRONMENT

Interactions between organisms & their physical, chemical environment  
Study of organisms and the environment interacting as a system  
As part of an ecosystem

Communities of the same species, living in the same area at the same time  
Communities of different species living and interacting in the same area  
and in which organisms live, accumulation of matter & energy flows

#### POPULATION

Group of individuals that can affect the size and distribution of population

Can be found in larger levels

Genes

Chromosomes

Cells

Organisms that affect the size and distribution of populations

Size

Can feed water and shelter

Population ecology is the study of organisms, distribution and abundance

Species richness of area

Can be found in larger levels and can affect the number of organisms

Can be found in larger levels and can affect the number of organisms
