*Sustainable Education and Development—Green Buildings* Clinton Aigbavboa,Wellington Thwala,Joseph N. Mojekwu,Lawrence Atepor,Emmanuel Adinyira,Gabriel Nani,Emmanuel Bamfo-Agyei,2024-11-22 This book is Volume 2 of the proceedings of 2023 Sustainable Education and Development Research Conference This volume concentrates on papers in the area of green buildings Despite considerable progress more than 700 million people worldwide still lack access to electricity and around 2 4 billion people continue to use harmful and polluting fuels for cooking While efforts have been made to promote renewable energy and energy efficiency they have not been fast

enough to achieve Sustainable Development Goal 7 Adding to the challenge the ongoing war in Ukraine has contributed to rising global energy prices and heightened energy insecurity in Europe In response to the energy crisis some European countries are planning to accelerate the transition to renewables and increase investments in clean energy and energy efficiency However others are considering a resurgence of coal which poses a risk to the overall green transition Between 2010 and 2020 the percentage of the global population with access to electricity increased from 83% to 91% with 1.3 billion people gaining access Nevertheless this leaves approximately 733 million people still without electricity and most of them reside in sub-Saharan Africa Achieving universal access by 2030 the annual growth rate in access needs to accelerate from 0.5 percentage points to 0.9 percentage points necessitating significant efforts in low income fragile and conflict affected countries In 2020 69% of the global population had access to clean cooking fuels and technologies While more than half of those without access to clean cooking fuels live in Asia the 20 countries with the lowest percentage of people having access to clean cooking were predominantly least developed countries in Africa The share of renewable sources in total final energy consumption reached 17.7% globally in 2019 just slightly higher than the figure for 2015 The electricity sector leads in the adoption of renewables accounting for 26.2% of total final energy consumption in 2019 while the heat and transport sectors have made limited progress Global primary energy intensity defined as global total energy supply per unit of GDP improved from 5.6 megajoules per dollar 2017 purchasing power parity in 2010 to 4.7 megajoules in 2019 However the rate of improvement 1.6% per year on average since 2015 falls short of the 3.2% annual rate needed to reach Sustainable Development Goal 7.3 International financial flows to support clean and renewable energy in developing countries reached 10.9 billion in 2019 a 23.6% decrease from 2018 This decline occurred even before the onset of the COVID-19 pandemic Over a longer five year moving average average annual commitments decreased for the first time since 2008 from 17.5 billion in 2014 to 16.6 billion in 2019 Although developing countries achieved a record of 245.7 watts per capita in installed renewable energy generating capacity in 2020 small island developing States least developed countries and landlocked developing countries have lagged behind It would take least developed countries and landlocked developing countries nearly 40 years and small island developing States almost 15 years to reach the same level of progress as the average developing country in 2020 The 2023 SEDRC conference titled Sustainable Development and Education aims to redefine the understanding of research in the continent's development and the role of researchers The conference focusses on applied research discussions and its dissemination Researchers from research institutions academicians postgraduate students politicians and industry representatives will be the primary audience for the conference proceedings [Routledge Handbook of Integrated Project Delivery](#) Derek Walker, Steve Rowlinson, 2019-07-26 The concept of integrated project delivery IPD has evolved as a result of the need for highly expert teams of people to collaborate to deliver extremely complex projects to manage expectations about delivery speed changes in governance standards and to take advantage of and

manage expectations raised by rapid advances in technology All this demands effective change management This is the first Handbook to contextualise and thematically explore the concept with an emphasis on rigorous practical and theoretical validation The Handbook is divided into five sections each with a focus on several interconnected themes including An introduction to IPD concepts The foundational elements and characteristics of IPD People culture and collaboration as key ingredients to successful and effective IPD Technology and process aspects of relational contracting forms such as IPD New and relevant perspectives to IPD that have received scant attention to date Aspects and emerging issues that are rarely consciously considered in traditional project delivery due to the commercial imperative that drives firms and client organisations The Handbook offers both discussions of these key themes and also in depth research into construction and other industry project procurement and delivery that spans decades In addition the Handbook presents best and better practice but also includes insights into cutting edge experimental developments in technology and practices where proof of concept is currently being developed into emerging practice Contributing authors in this Handbook collaborate with the co editors to draw together an integrated set of chapters that align to deliver a coherent narrative of the IPD concept It is an invaluable reference for practitioners and academics alike and useful as core course content for numerous degree programs of study and professional development courses

**Strategic Integrated Program Delivery** Mark Betts, Peter E.D.

Love, Derek H.T. Walker, 2024-12-04 This book outlines a cutting edge form of program delivery which the authors term SIP Form or Strategic Integrated Program delivery Using the Melbourne Level Crossing Removal Program LXRP consisting of the removal of 85 dangerous level crossings throughout metropolitan Melbourne including rail station upgrades signalling and track work and other associated capital works as an exemplar the book sets out four features that the authors argue define the SIP form concept as follows The organisation delivers a program of projects many using an IPD contract variant form such as a Project Alliance Agreement PAA in Australia and numerous other countries or the Integrated Form of Agreement IFoA in North America The contract form adopted is used and has been strategically designed to accommodate the project s risk and uncertainty profile as is the case with the LXRP Projects within the program are integrated with some being concurrently delivered with coordination across the projects in a coherent and highly purposeful manner Projects are not included that do not strategically fit the overall program delivery strategy There is a strategy for learning and innovation diffusion across projects concurrently and sequentially Lessons to be learned are learned through designed in governance mechanisms The LXRP is a potentially unique program of projects and the book takes the reader on a journey through this complex program and after giving the background and relevant context covers topics such as strategy governance procurement collaboration program alliance HRM leadership digital innovation continuous improvement community engagement and performance measurement This detailed analysis of such a complex program of projects makes this book essential reading for project managers engineers and advanced students of project delivery and management

**Making**

**Sense of Construction Improvement** Stuart Green, 2023-12-15 Making Sense of Construction Improvement provides a critical evaluation of the construction improvement debate from the end of the Second World War through to the modern era. The book offers unique insights into the way the UK construction sector is continuously shaped and re-shaped in accordance with changes in the prevailing political economy. This second edition brings the book up to date by including coverage of key trends from 2010-2023. The book has been substantially revised and reworked to include new material relating to the age of austerity and the subsequent period of political uncertainty initiated by the Brexit referendum. Changes in the political economy are positioned alongside the rise of the sustainability agenda and the advent of zero carbon. Particular attention is paid to the ongoing skills crisis and the over-hyped advocacy of modern methods of construction (MMC) as the latest supposed panacea of industry improvement. Coverage includes the Farmer 2016 report 'Modernise or Die' and the Construction Playbook HM Government 2020. However, perhaps the most important addition is a focus on the Grenfell Disaster 2017 and the subsequent revelations from the public enquiry. Further intermediate milestones include Building a Safer Future Hackitt 2018 and the Construction Sector Deal HM Government 2018. The emerging consensus points towards a systemic failure involving not only the construction sector but also the entire system of regulation and compliance. Tracing the failings back over time and scrutinising the role played by previous generations of policymakers, Stuart Green ultimately argues that Grenfell was a disaster entirely foretold. The insightful and critical analysis of the industry contained within these pages is essential and timely reading for anyone who wants to understand how the construction sector arrived at where it is today and with that knowledge give further thought to where it might go next.

**The Management of Complex Projects** Stephen Pryke, Hedley Smyth, 2012-11-20 Value is added to projects through the relationships surrounding the client; the focus of this book is therefore the client as project rather than the building on the ground. It shows how to create and maintain effective relationships between the client and the project team as well as intra-coalition relationships. Students, academics and practitioners need to understand the changing nature of reforms from successive calls for change by the industry's various clients and client groups. Project team network relationships are a function of mindsets, behaviour and competencies of individuals. **The Management of Complex Projects** a relationship approach. Explores the relationship at the project interface: client, design team, contractor, stakeholders and supply chain relations. Examines different concepts to the development and management of relationships: formation and maintenance issues. Highlights some of the key issues that require development both academically and through applied research. Most project management books cover tools and techniques; this one covers the softer skills and shows how crucial good relationships are to the successful management of projects.

***Property Development*** David Cadman, Rosalyn Topping, 1995 This text on the commercial property development process is aimed at students of all disciplines related to the built environment. It provides a practical overview of the process focusing on such things as land acquisition and planning.

**Integrated Construction Information** M. Betts, P.S.

Brandon, Martin Betts Nfa, 2003-09-02 The construction industry is an information intensive sector and low levels of productivity are often blamed on inadequate integration of information This book shows how the different types and sources of information can be integrated to benefit individual construction projects construction companies and in the construction industry at world wide level

The Top Books of the Year Introduction To Building Procurement The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous compelling novels enthralling the hearts of readers worldwide. Lets delve into the realm of popular books, exploring the engaging narratives that have charmed audiences this year. Introduction To Building Procurement : Colleen Hoover's "It Ends with Us" This heartfelt tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of captivating stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and suspenseful novel that will keep you speculating until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
