Electricity \_\_\_\_\_ most important inventions ever. It is the thing that powers the Earth. \_\_\_\_\_ no electricity, we'd be back in the dark ages. Few people stop and \_\_\_\_\_ amazing electricity is. With the flick of a switch, \_\_\_\_\_ almost anything. Think \_\_\_\_\_ happen if there was no electricity. We'd have no TV, no computers, no traffic signals. It would be like \_\_\_\_\_ living in caves. There are a few \_\_\_\_\_ about electricity, of course. Number one, it's dangerous. Thousands \_\_\_\_\_ each year from electrocuting themselves or in electrical fires. And number two, it \_\_\_\_\_ the environment. Most electricity comes from \_\_\_\_\_ and that creates greenhouse gasses.

Eskildsen, Simona Pekarek Doehler, Arja Piirainen-Marsh, 2019-11-04 This volume offers insights on language learning outside the classroom or in the wild where L2 users themselves are the driving force for language learning

The chapters by scholars from around the world critically examine the concept of second language learning in the wild. The authors use innovative data collection methods such as video and audio recordings collected by the participants during their interactions outside classrooms and analytic methods from conversation analysis to provide a radically emic perspective on the data. Analytic claims are supported by evidence from how the participants in the interactions interpret one another's language use and interactional conduct. This allows the authors to scrutinize the term wild, showing what distinguishes L2 practices in our different datasets and how those practices differ from the L2 learner data documented in other more controlled settings such as the classroom. We also show how our findings can feed back into the development of materials for classroom language instruction and ultimately can support the implementation of usage-based L2 pedagogies. In sum, we uncover what it is about the language use in these contexts that facilitates developmental changes over time in L2 speakers and their co-participants' interactional practices for language learning.

**The Experimental City** James Evans, Andrew Karvonen, Rob Raven, 2016-05-20 This book explores how the concept of urban experimentation is being used to reshape practices of knowledge production in urban debates about resilience, climate change governance and socio-technical transitions. With contributions from leading scholars and case studies from the Global North and South, from small to large scale cities, this book suggests that urban experiments offer novel modes of engagement, governance and politics that both challenge and complement conventional strategies. The book is organized around three cross-cutting themes. Part I explores the logics of urban experimentation, different approaches and how and why they are deployed. Part II considers how experiments are being staged within cities, by whom and with what effects. Part III examines how entire cities or groups of cities are constructed as experiments. This book seeks to contribute a deeper and more socially and politically nuanced understanding of how urban experiments shape cities and drive wider changes in society, providing a framework to examine the phenomenon of urban experimentation in conceptual and empirical detail.
