**Ebook: Purchasing and Supply Chain Management** BENTON, 2014-07-16 **Ebook Purchasing and Supply Chain Management** Decision Modelling and Information Systems Nikitas-Spiros Koutsoukis, Gautam Mitra, 2012-12-06 In Decision Modelling And Information Systems The Information Value Chain, the authors explain the interrelationships between the decision support, decision modelling, and information systems. The first two parts of the book focus on the interdisciplinary decision support framework in which mathematical programming optimization is taken as the inference engine. The role of business analytics and its relationship with recent developments in organisational theory, decision modelling, information systems, and information technology are considered in depth. Part three of the book includes a carefully chosen selection of invited contributions from internationally known researchers. These contributions are thought-provoking and cover key decision modelling and information systems issues. The final part of the book covers contemporary developments in the related area of business intelligence, considered within an organizational context. The topics cover computing, delivered across the web, management decision making, and socio-economic challenges that lie ahead. It is now well accepted that globalisation and the impact of digital economy are profound, and the role of e-business and the delivery of decision models, business analytics across the net, lead to a challenging business environment. In this dynamic setting, decision support is one of the few interdisciplinary frameworks that can be rapidly adopted and deployed so that businesses can survive and prosper by meeting these new challenges. **EBOOK: Operations and Supply Chain Management, Global edition** F.
