Mass Media in 2025 Erwin K. Thomas, Brown H. Carpenter, 2001-08-30 The future of mass media may appear unpredictable and too complex to fathom but *Mass Media in 2025* takes a scholarly theoretical approach to identifying trends and explaining their possibilities Noted contributors approach a variety of media with a solid grounding in the history of each and an eye for which may be vulnerable and which may thrive in the new technological age Trends such as interactivity and niche building will affect everything from the newspaper to public relations and this collection of essays provides a fascinating guide to where the next decades may take us Regardless of the visual aural or printed form *Mass Media in 2025* illustrates the degree to which older media will have to incorporate the level of interaction and specialization offered by newer media if they are to survive These effects can already be seen in the proliferation of television channels in the ironic bent of advertising in the rise of infotainment in news organizations This book shows not only how all of this has come to be but also more importantly where it will go

Women's Rights and Social Change Leslie Armstrong, 2018-11-23 Women's rights are the rights and entitlements claimed for women and girls worldwide and formed the basis for the women's rights movement in the nineteenth century and feminist movement during the 20th century In some countries these rights are institutionalized or supported by law local custom and behavior whereas in others they are ignored and suppressed They differ from broader notions of human rights through claims of an inherent historical and traditional bias against the exercise of rights by women and girls in favor of men and boys *Women's Rights and Social Change* focuses attention on the way in which women from a

number of traditions have been able to bring about change and the manner in which rights have either facilitated or inhibited women's participation in the process of change. In the face of injustice, people band together to work for change, and through their influence, what was once unthinkable becomes common. This book traces the history of the women's rights movement, including the key players, watershed moments, and legislative battles that have driven social change. This book should be of interest to all those interested in gender development and women empowerment and researchers and students.

Global Perspectives on the Impact of Mass Media on Electoral Processes Aririguzoh, Stella Amara, 2021-03-18. The media play active roles in politics with different media channels serving as bridges that link the politicians and citizens together. It is clear that what the media emphasize as important may be seen as such by the public. Hence, it is likely that the media may impact voter decisions during electoral processes and even during the elections. As such, it is imperative that research is collected on the impact of the media and the role it plays in strengthening party loyalty, improving public knowledge on elections, and swaying apathetic citizens to become involved in the electoral process. *Global Perspectives on the Impact of Mass Media on Electoral Processes* provides relevant theoretical frameworks and research findings that evidence the impact of the media in specific elections in different countries around the world. The book supports professionals who want to improve their understanding of the strategic roles that the media play in electoral politics, as well as political candidates who may want to know if their heavy expenditures in paying the media to carry their political messages bring in returns on their investment. Covering topics that include social media, political cartoons, and media influence, this book seeks to provide fresh insights on the media's impact on elections, whether at the national, regional, or local levels. It is ideal for politicians, campaign managers, media analysts, government officials, professionals, researchers, students, academicians, and individuals involved in electoral management, political parties, advertising agencies, and marketing companies.

Journalism Pedagogy in Transitional Countries Diana Garrisi, Xianwen Kuang, 2022-12-04. This book explains what it means to teach journalism in countries with limited media freedom in the post-pandemic era. It digs into the social and historical factors underpinning the development of journalism, university degrees and courses, in a selection of illustrative case studies taken from Africa, Asia, Europe, and Latin America. This work assesses both the limitations and creative opportunities arising from teaching journalism under constraints. Topics include, but are not limited to, the application of Western theoretical frameworks in new transnational universities in China, the historical and political roots of the gap between industry and academia in Slovenia, ideological clashes and classism in higher education in the Arab region, scholar activism in Turkey, decolonizing journalism curricula in South Asia, journalism students as research partners in the Philippines, and the repression of the student press in Mexico. Although this book focuses broadly on the Global South, the theoretical and practical implications of its findings and related discussion will inform the challenges facing journalism training today as a whole.

Audience Genre Expectations in the Age of Digital Media Leo W. Jeffres, David J. Atkin, Kimberly A. Neuendorf, 2022-12-05. This volume bridges the divide

between film and media studies scholarship by exploring audience expectations of film and TV genre in the age of digital streaming using qualitative thematic and quantitative data driven analyses Through four ground breaking surveys of audience members and content creators the authors have empirically determined what audiences expect of various genres the extent to which these definitions match those of scholars and critics and the overall variation and complexity of audience expectations in the age of media abundance They also examine audience habits and preferences drawing from both theory and original empirical analyses with a view toward the implications for the moving image in a rapidly changing media environment The book draws from the data to develop a number of new concepts including genre repertoire genre hybridity audience interest maximization and variety seeking and a new stage of genre development genre bending It is an ideal resource for students and scholars interested in the symbiotic relationship between audiences and the moving image products they consume as well as the way the current digital media environment has impacted our understanding of film and TV genres
