## Unit 1: What is criminology about?

Criminology is the study of crime, criminals and criminal justice.

Criminologists look at the problem of crime in an attempt to explain criminal behaviour and to prevent and control it.

The goal of criminology is to understand crime and to determine how that understanding can benefit society.

Crime is the consequence of a whole set of factors which cannot be understood by looking at only one or two of them in isolation.

Criminologists study the causes of crime; society's reaction to crime; differences in the nature and scope of crime between countries and between communities in the same area and why some people commit crimes while others in similar circumstances do not.

Criminologists also try to explain the judicial process.

Criminologists further study the victims of crime and try to determine why people become victims as well as examining the profile of a crime victim and what makes people prone to victimisation. The prevention and control of crime and victimisation are an important area of study.

Sutherland defines criminology as the study of law making, law breaking and reactions to law breaking.

Schmallegger defines criminology as the scientific study of crime and criminal behaviour, including the ways in which crime occurs, the causes of crime, the legal aspects of crime and crime control as well as possible solutions to the crime problem.

Criminologists also research the criminal justice system and suitable treatment for offenders to help prevent recidivism (relapses into crime).

Criminologists can also submit reports and give evidence in court in order to explain offenders' criminal behaviour, thereby helping the court to impose appropriate sentences.
