$$a, ar, ar^2, ar^3, \dots$$

Example: 2, 6, 18, 54, 162, ...

Problems and Solutions in Biological Sequence Analysis Mark Borodovsky, Svetlana Ekisheva, 2006-09-04 This book is the first of its kind to provide a large collection of bioinformatics problems with accompanying solutions Notably the problem set includes all of the problems offered in Biological Sequence Analysis by Durbin et al Cambridge 1998 widely adopted as a required text for bioinformatics courses at leading universities worldwide Although many of the problems included in Biological Sequence Analysis as exercises for its readers have been repeatedly used for homework and tests no detailed solutions for the problems were available Bioinformatics instructors had therefore frequently expressed a need for fully worked solutions and a larger set of problems for use on courses This book provides just that following the same structure as

Biological Sequence Analysis and significantly extending the set of workable problems it will facilitate a better understanding of the contents of the chapters in BSA and will help its readers develop problem solving skills that are vitally important for conducting successful research in the growing field of bioinformatics All of the material has been class tested by the authors at Georgia Tech where the first ever MSc degree program in Bioinformatics was held

Mediated Discourse as Social Interaction Ron Scollon, 2014-06-11 Mediated Discourse as Social Interaction makes an explicit link between media studies and social interactionist discursive research where previously the two fields of study have been treated as separate disciplines This text presents an integrated theory illustrated by ample concrete examples bringing together the latest research in these two fields It offers a critique to the sender receiver model implicit in media studies and argues for an analysis of media discourse as social interaction on the one hand among journalists and newsmakers as a community of practice and among readers and viewers as a spectating community of practice on the other The book also argues for a coherent and interdiscursive methodology for the ethnographic study of the role of the news media in the social construction of identity and is based on a considerable body of ethnographic and textual analysis of both print and television news media The theory of mediated discourse presented in this volume will be of great interest to advanced undergraduates and postgraduates studying media studies sociology of language discourse analysis interactional sociolinguistics ethnography of communication and applied linguistics It will also be welcomed by scholars and professionals involved in research in these areas
