Geometry is now recognized as an important branch of Mathematics Those who teach Geometry should have some
knowledge of this subject and all who are interested in Mathematics will find much to stimulate them and much for them to
enjoy in the novel results and views that it presents This book is an attempt to give a simple and direct account of the Non
Euclidean Geometry and one which presupposes but little knowledge of Mathematics The first three chapters assume a
knowledge of only Plane and Solid Geometry and Trigonometry and the entire book can be read by one who has taken the
mathematical courses commonly given in our colleges *Introductory Non-Euclidean Geometry* Henry Parker

ISBN 978 65 00 98107 0 The Fourth Dimension and Non-Euclidean Geometry in Modern Art, revised edition Linda
Dalrymple Henderson, 2018-05-18 The long awaited new edition of a groundbreaking work on the impact of alternative

concepts of space on modern art In this groundbreaking study first published in 1983 and unavailable for over a decade Linda Dalrymple Henderson demonstrates that two concepts of space beyond immediate perception the curved spaces of non Euclidean geometry and most important a higher fourth dimension of space were central to the development of modern art The possibility of a spatial fourth dimension suggested that our world might be merely a shadow or section of a higher dimensional existence That iconoclastic idea encouraged radical innovation by a variety of early twentieth century artists ranging from French Cubists Italian Futurists and Marcel Duchamp to Max Weber Kazimir Malevich and the artists of De Stijl and Surrealism In an extensive new Reintroduction Henderson surveys the impact of interest in higher dimensions of space in art and culture from the 1950s to 2000 Although largely eclipsed by relativity theory beginning in the 1920s the spatial fourth dimension experienced a resurgence during the later 1950s and 1960s In a remarkable turn of events it has returned as an important theme in contemporary culture in the wake of the emergence in the 1980s of both string theory in physics with its ten or eleven dimensional universes and computer graphics Henderson demonstrates the importance of this new conception of space for figures ranging from Buckminster Fuller Robert Smithson and the Park Place Gallery group in the 1960s to Tony Robbin and digital architect Marcos Novak Educational Review ,1901 **Educational Review** Nicholas Murray Butler, Frank Pierrepont Graves, 1901 Vols 19 34 include Bibliography of education for 1899 1906 compiled by James I Wyer and others **Who's who Among North American Authors** ,1921 *The Fourth Dimension Simply Explained* Henry Parker Manning, 1910 **Education Outlook** ,1900 **Educational Times** ,1901 *The Educational Times, and Journal of the College of Preceptors* ,1901 **Geometry of Four Dimensions** Henry Parker Manning, 1914
