

Invertebrate Classification Challenge

I designed this activity to allow students to practice invertebrate classification using the signatures described to us without first studying them (which I'll do in the Period of Echin. lesson).

I printed the pages for the classification cards at 8 1/2 x 11 each page, taped the two pages together, and laminated them. I also made several copies of the signature cards, which were printed at each size and used in the Echin. Page.

For the activity, students work in teams to classify the signatures and then compare their guesses to the key answer sheets. I also provide the "What are???" questions for students to fill in and suggest to them some projects as they work (study subsets of class). I also give them a quiz or discussion which tests they know and which ones they don't.

Challenge: I also challenge the students to see that others in an article team can complete it in the same time. Many of my students are able to correctly identify all the signatures in 10 seconds or less. Trainers must have perfect match time there. The class is surprisingly fast shuffling the cards and placing them in one pile at the end of a round.

Science for Primary School Teachers Helena Gillespie, Rob Gillespie, 2007-12-16 What do I need to know about science to teach children in primary school? How can I make my science teaching successful? How do children learn to investigate scientifically? What are the dos and don'ts of science teaching? Written to support teachers who need to boost their science knowledge, this book covers science knowledge in sufficient breadth and depth to enable you to teach science effectively up to the end of Key Stage 2, as well as the core teaching and learning issues involved in the investigative process. Whether you are a student or a fully qualified teacher, the book is designed to help you find what you need quickly. The introduction provides a guide to how to use the book, including a table which cross-references the subject knowledge against the National Curriculum, the QCA Scheme of Work, and Primary Science Topics. This enables you to use the book in different ways depending on your individual requirements. To ensure that teachers will be able to teach and respond to questions appropriately, the authors take science knowledge beyond what is required for Key Stage 2. This is important as it helps to avoid oversimplifying concepts which can then cause misconceptions at Key Stage 3 and beyond. It also helps to broaden and develop the primary teacher's own knowledge. *Science for Primary School Teachers* is a core text for teachers in training and in professional development into the induction year and beyond.
