Laboratory Exercises in Invertebrate Zoology Alan Holyoak, 2016-10-12 The cost of textbooks and laboratory support materials has skyrocketed over the past few decades A new copy of a laboratory manual in invertebrate zoology published by a textbook company can now cost over 100 copy In my opinion this is just too expensive especially when such a lab manual may be woefully out of date That's why I developed a set of exercises several years ago to support my course in invertebrate zoology When I learned about the CreateSpace self publishing service I decided to make these exercises more broadly available 1st edition 2013 In the meantime I solicited feedback from users and worked to review and update materials in these exercises in light of recent developments in the field The 3rd Edition of Invertebrates by Brusca et al was released in winter 2016 and I decided to update all taxonomies and related material in the second edition of this set of laboratory exercises to conform with information in that textbook This new edition includes a significant changes and improvements in many areas including the following

- 1 82 pages of new material
- 2 71 new figures 169 figures total
- 3 46 links to supplemental video material on the anatomy or behavior of invertebrates
- 4 A glossary of terms at the end of each chapter
- 5 Updated and expanded taxonomic information for all groups following Invertebrates 3rd Ed by Brusca et al 2016
- 6 Tables listing defining characteristics for major taxa are included in each chapter
- 7 Inclusion of word roots word meanings for many taxonomic names
- 8 A taxonomic index replaces the cumbersome index of the 1st edition
- 9 Addition of a procedure for calibrating and using an ocular micrometer to the chapter on microscopy
- 10 Replacement of the old overly complicated exercise on cladistics with a new streamlined exercise
- 11 Addition of an entirely new chapter on Domain Eukarya including life cycles of pathogens This chapter includes an introduction to Group Amoebozoa Group Chromalveolata Group Rhizaria Group Excavata and Group Opisthokonta
- 12 Addition or expansion of exercises on corals and siphonophores to the chapter on Cnidarians
- 13 Addition of Phylum Ctenophora to the lab manual
- 14 Addition of a larger number of nematode representatives including Tubatrix and the pathogens Trichinella Wuchereria Enterobius Dracunculus and Dirofilaria including their life cycles to the chapter on Phylum Nematoda
- 15 Addition of tardigrades onychophorans and pycnogonids to the chapter on Panarthropoda
- 17 New and expanded material on arachnids and myriapods in the chapter on Panarthropoda
- 16 Addition of ophiuroids to the chapter on echinoderms

And the price is still set with students in mind at only 20 copy for a hard copy version and even less for a Kindle
