Management, Eighth Edition, Frank K. Reilly ... Frank K. Reilly, 2006 Project Portfolio Management Harvey A. Levine, 2005-07-20 Project Portfolio Management PPM goes beyond the typical project management approach to offer a set of proven business practices that can help executives program managers and project managers bring projects into alignment with the strategies resources and executive oversight of the overall enterprise Step by step this book shows how to take a project from the inception of a vision to the realization of benefits to the organization Project Portfolio Management draws on project management expert Harvey A Levine s years of research and distills the knowledge and best practices from dozens of leaders in the field to show how to select and implement the projects that will garner the best results Throughout this important resource Levine tackles the many challenges associated with PPM including Ranking value and benefits Determining the size of the portfolio pipeline Assessing the impact of uncertainty on projects and portfolios Understanding the benefit and risk relationship Establishing a portfolio governance capability Managing the portfolio to maximize benefits Implementing PPM **Implementation of a Performance Attribution System in a Funds Management Company** Marc Vogel, 2005-03-31 Inhaltsangabe Introduction Within this thesis fundamentals of performance attribution are treated as well as the practical implementation of such a system However for many people who already asked to receive a copy of this

work the most important part will be the analysis of the partly internet based questionnaire revolving around performance attribution. The theoretical part contains the fundamentals of portfolio theory and the constructive CAPM followed by basics of portfolio management. Next topics are the estimation of risk and performance for investment portfolios. The finishing touch is done by introduction of performance attribution theories handling both equity and bond attribution. Within the practical part a short analysis of the affected asset management company is performed accompanied by research of performance presentation. A questionnaire has been sent to 80 non banks of the German HDAX index as well as to all members of the BVI. Furthermore an internet based version of the questionnaire has been introduced to a large number of institutional clients. The analysis of this questionnaire is one of the topics of this work. For the affected company the results from the questionnaire are used to identify the competitors possibilities and the clients needs resulting in fundamental ideas for the catalogue of requirements. The analysis of the investment process and based on this the choice and the implementation of a performance attribution system are the last parts of this work. Still it has to be mentioned that recommendations for organizational changes are part of implementation. There are three reasons why this thesis has been prepared. The first one is quite trivial. As performance attribution is more and more present in the market deeper knowledge of it shall be gained for the affected company. Primarily the department for quantitative research and information technology has to come up with this knowledge to act as a multiplier and to ascertain technological and or organizational requirements for its implementation. Another scope of this work is to determine the actual status of performance attribution performed by competitors. To get this information competition is referred to and likewise clients of competitors are interviewed. To benefit from this thesis not only the theoretical background will be looked upon but there will be approaches to completely integrate performance attribution. Proposed usage will
