James Merrill's Poetic Quest Don Adams, 1997-04-30 Relatively little critical attention has been directed towards the explication of James Merrill's difficult poems, much less towards the understanding of his densely layered symbolism. This is the first comprehensive study to look at Merrill's difficult symbolic system and to provide a close reading of Merrill's epic poem *The Changing Light at Sandover*. Adams reads Merrill's poetry through various lenses, primarily those of Freudian psychology and of the Jungian archetypal system. His approach allows the reader to view individual works as part of the larger picture of Merrill's quest to save his life through his art.

Third Person Pat Harrigan, Noah Wardrip-Fruin, 2017-03-03 Narrative strategies for vast fictional worlds across a variety of media, from *World of Warcraft* to *The Wire*. The ever-expanding capacities of computing offer new narrative possibilities for virtual worlds. Yet vast narratives featuring an ongoing and intricately developed storyline, many characters, and multiple settings did not originate with, and are not limited to, Massively Multiplayer Online Games. Thomas Mann's *Joseph and His Brothers*, J. R. R. Tolkien's *Lord of the Rings*, Marvel's *Spiderman*, and the complex stories of such television shows as *Dr. Who*, *The Sopranos*, and *Lost* all present vast fictional worlds. *Third Person* explores strategies of vast narrative across a variety of media, including video games, television, literature, comic books, tabletop games, and digital art. The contributors, media and television scholars, novelists, comic creators, game designers, and others, investigate such issues as continuity, canonicity, interactivity, fan fiction, technological innovation, and cross-media phenomena. Chapters examine a range of topics, including storytelling in a multiplayer environment, narrative techniques for a 3,000,000-page novel, continuity or the impossibility of it in *Doctor Who*, managing multiple intertwined narratives in superhero comics, the spatial experience of the *Final Fantasy* role-playing games, *World of Warcraft* adventure texts created by designers and fans, and the serial storytelling of *The Wire*. Taken together, the multidisciplinary conversations in *Third Person*, along with Harrigan and Wardrip-Fruin's earlier collections *First Person* and *Second Person*, offer essential insights into how fictions are constructed and maintained in very different forms of media at the beginning of the twenty-first century.

Theory and Methods for Supporting High Level Military Decisionmaking Paul K. Davis, James P. Kahan, 2007 This report describes an approach to high-level decision support for a Joint Forces Air Component Commander in combat operations or a Chief of Staff in defense planning. Its central theme is the fundamental importance of dealing effectively with uncertainty, whether in effects-based operations, building the Air Force's Commander's Predictive Environment, or planning future forces with the methods of capabilities-based planning. Because many features of the future

cannot be predicted with reasonable confidence it is better to proceed with the expectation of surprise developments and to have skill in recognizing adaptations and making them than it is to treat uncertainty merely as an annoyance This report sketches the framework of a high level decision support environment that is top down expresses concepts in simple and intuitive language deals explicitly with risk and uncertainty and provides the capability for decisionmakers to readily discover and question the bases for key assumptions and assessments It can accommodate both rational analytic and naturalistic decisionmakers allowing them to produce strategies that are flexible adaptive and robust FAR Two explicit methods and their related tools are described The first involves portfolio style thinking and analysis a good mechanism for balancing risks and other considerations in choosing a course of action The second is a novel modification of foresight exercises that addresses the need to include humans effectively in dealing with uncertainty A more extensive discussion of available methods and enabling technologies is also presented along with some recommendations about investment priorities **The Quest** Lyman
