Yacoubian,Lena Hansson,2020-09-08 This edited volume brings closer two contemporary science education research areas Nature of Science NOS and Social Justice SJ

It starts a dialogue on the characteristics of NOS for SJ with the purpose of advancing the existing discussion and creating new avenues for research. Using a variety of approaches and perspectives, the authors of the different chapters engage in a dialogue on the construct of NOS for SJ, its characteristics, as well as ways of addressing it in science classrooms. Issues addressed are related to why a school science aiming at SJ should address NOS, what NOS-related content, skills, and attitudes form the basis when aiming at SJ, and how school science can address NOS for SJ. Through a set of theoretical and empirical chapters, the authors suggest answers but they also pose new questions on what NOS for SJ can mean and what issues need to be taken into consideration in future research and practice. This book gives a special emphasis to state-of-the-art descriptions of approaches, methods, initiatives, and projects from universities, stakeholders, organizations, and civil society across the world regarding cross-cutting issues in sustainable development. There is a perceived need for mobilizing the various stakeholders when attempting to promote sustainability in higher education and to promote best practices which may inspire further initiatives. But despite this need, there are a few publications handling this matter in a coherent way. In order to meet the pressing need for publications which may document and disseminate examples of best practice on sustainable development at university level, the Handbook of Best Practices in Sustainable Development at University Level is being published. This book is produced by the European School of Sustainability Science and Research (ESSSR) through the Inter-University Sustainable Development Research Programme (IUSDRP) and contains inputs from authors across all geographical regions. The book also discusses examples of initiatives coordinated by universities but involving civil society, the private sector, and public sector, including local, national, and intergovernmental bodies. In particular, it describes practical experiences, partnerships, networks, and training schemes for building capacity aimed at fostering the cause of sustainable development at institutions of higher education.
