Human Steve Hilton, Scott Bade, Jason Bade, 2016-04-26 People feel angry and let down by their leaders as well as by the institutions that dominate their lives: political parties, government bureaucracy, and corporations. Yet the cause of this malaise, according to political advisor turned tech CEO Steve Hilton, is not being addressed by politicians on the left or the right. Hilton argues that much of our daily experience, from the food we eat to the governments we elect to the economy on which our wealth depends to the way we care for our health and well-being, has become too big, too bureaucratic, and too distant from the human scale. **More Human** sets out a radical manifesto for change aimed at the root causes of our problems rather than just the symptoms. Whether it's using the latest advances in neuroscience to inform the fight against poverty and inequality or applying lessons from America's most radical schools to transform our children's education, this book is an agenda for rethinking and redesigning the outdated systems and structures of our politics, government, economy, and society to make them more suited to the way we want to live our lives today. To make them more human. **Insider Trading and**

Market Manipulation Janet Austin, 2017-12-29 This book explores how the globalization of securities markets has affected market manipulation and insider trading. It delves into the responses of securities regulators, discussing new regulations designed to deter such misconduct as well as the ways in which detection, investigation, and prosecution techniques are adapting to tackle insider trading and market manipulation that crosses international boundaries. **The Emergence of**

Brand-Name Capitalism in Late Colonial India Douglas E. Haynes, 2022-09-22 This book examines the emergence of professional advertising in western India during the interwar period. It explores the ways in which global manufacturers advanced a brand-name capitalism among the Indian middle class by promoting the sale of global commodities during the 1920s and 1930s, a time when advertising was first introduced in India as a profession and underwent critical transformations. Analysing the cultural strategies, both verbal and visual, used by foreign businesses in their advertisements to capture urban consumers, Haynes argues that the promoters of various commodities crystalized their campaigns around principles of modern conjugality. He also highlights the limitations of brand-name capitalism during this period, examining both its inability to cultivate markets in the countryside or among the urban poor and its failure to secure middle-class customers. With numerous examples of illustrated advertisements taken from Indian newspapers, the book discusses campaigns for male sex

tonics and women's medicines, hot drinks such as Ovaltine and Horlicks, soaps such as Lifebuoy, Lux and Sunlight, cooking mediums such as Dalda and electrical household technologies. By examining the formation of brand name capitalism and two key structures that accompanied it, the advertising agency and the field of professional advertising, this book sheds new light on the global consumer economy in interwar India and places developments in South Asia into a larger global history of consumer capitalism.

Arms Sales and Regional Stability The International Institute for Strategic Studies (IISS), 2023-04-28

The book considers the main arms exporting countries including China, Russia and the US as well as several European states and the policies each employs in deciding advanced weapons sales to key regions of the world. It examines whether such sales are inherently stabilising or destabilising regarding regional security. Regions reviewed in detail include the Middle East and the Indo Pacific. Combat aircraft sales are a focus for the volume given both their practical and symbolic importance. The volume focuses on the behaviour and policies of the main arms exporting nations since the end of the Cold War, shifts in their arms export policies and the tensions that can emerge within or between countries over proposed arms sales. It also considers the impact of countries that were previously only recipients of advanced weapons moving to develop their own defence industrial base.

The Closing of the Liberal Mind Kim R. Holmes, 2017-12-12

A former U.S. Assistant Secretary of State and currently Acting Senior Vice President for Research at The Heritage Foundation, Kim R. Holmes surveys the state of liberalism in America today and finds that it is becoming its opposite: illiberalism, abandoning the precepts of open-mindedness and respect for individual rights, liberties and the rule of law upon which the country was founded and becoming instead an intolerant, rigidly dogmatic ideology that abhors dissent and stifles free speech. Tracing the new illiberalism historically to the radical Enlightenment, a movement that rejected the classic liberal ideas of the moderate Enlightenment that were prominent in the American Founding, Holmes argues that today's liberalism has forsaken its American roots, incorporating instead the authoritarian, anti-clerical and anti-capitalist prejudices of the radical and largely European Left. The result is a closing of the American liberal mind. Where once freedom of speech and expression were sacrosanct, today liberalism employs speech codes, trigger warnings, boycotts and shaming rituals to stifle freedom of thought, expression and action. It is no longer appropriate to call it liberalism at all, but illiberalism, a set of ideas in politics, government and popular culture that increasingly reflects authoritarian and even anti-democratic values and which is devising new strategies of exclusiveness to eliminate certain ideas and people from the political process. Although illiberalism has always been a temptation for American liberals lurking in the radical fringes of the Left, it is today the dominant ideology of progressive liberal circles. This makes it a new danger, not only to the once venerable tradition of liberalism but to the American nation itself, which needs a viable liberal tradition that pursues social and economic equality while respecting individual liberties.
