A Textbook of Electrical Technology R. K. Rajput, 2004 *The Development of Electrical Technology in the 19th Century*
United States National Museum, 1962 Grid Optimal Integration of Electric Vehicles: Examples with Matlab
Implementation Andrés Ovalle, Ahmad Hably, Seddik Bacha, 2018-02-04 This book is a compilation of recent research on
distributed optimization algorithms for the integral load management of plug in electric vehicle PEV fleets and their potential
services to the electricity system It also includes detailed developed Matlab scripts These algorithms can be implemented
and extended to diverse applications where energy management is required smart buildings railways systems task sharing in
micro grids etc The proposed methodologies optimally manage PEV fleets charge and discharge schedules by applying
classical optimization game theory and evolutionary game theory techniques Taking owner s requirements into consideration
these approaches provide services like load shifting load balancing among phases of the system reactive power supply and
task sharing among PEVs The book is intended for use in graduate optimization and energy management courses and readers
are encouraged to test and adapt the scripts to their specific applications **The Electrical Engineer** ,1905
