During the second half of the 20th century intelligence co operation between the three North Atlantic powers of America
Britain and Canada played a vital role in Western struggles against Nazi Germany Imperial Japan Soviet Russia and their
lesser allies As demonstrated in the case studies in this volume World War II cemented loose and often informal inter allied
agreements on security intelligence that had preceded it and created new and important areas of close and formal co
operation in such areas as codebreaking and foreign intelligence But what was the true nature of this co operation Wartime
myths have obscured much of the reality and while the western powers undoubtedly benefited from the dividends of these
agreements during the Cold War that followed they also experienced restrictions on national sovereignty whose costs have
often caused controversy while the search for co operation frequently provided cause for friction
