Diverse Early Childhood Education Policies and Practices Amita Gupta, 2014-04-29 Diverse Early Childhood Education Policies and Practices explores issues in early childhood education and teacher preparation in five Asian countries India Singapore China Sri Lanka and the Maldives Some observed classrooms in these countries reflect influences that are simultaneously indigenous and colonial local and global By highlighting the diverse and often hybrid classroom pedagogies at work in these 21st century Asian classrooms the discussions in this book take into consideration the influence of globalization

on local policies and practices and the challenge educators face when they are expected to reconcile different and sometimes conflicting cultural and pedagogical world views Through a research driven analysis of key issues such as recent revisions to national early childhood education policies perceptions on play based and child centered pedagogy curriculum and learning materials and an emphasis on the teaching of values this book illuminates the diversity of the observed classrooms as well as current trends in early childhood education in parts of Asia The cross national perspective serves to expand and diversify the global discourse of early childhood education and teacher education

CyberLit Marilyn Dover Newman, 2004 Elementary school media specialists and teachers routinely use children s picture books in their lessons These books add depth and vitality to the curriculum because they are written and illustrated by some of the world s most gifted writers and artists Yet educators are finding it increasingly harder to insert this pleasant and important activity into the busy school day due to increased pressures to improve test scores to implement a standards driven curriculum and to stay abreast of new technologies to deliver instruction This book helps educators continue to incorporate literature into the school day in spite of these obstacles *CyberLit* is a book for those who work with or teach others who work with children in the primary grades It is for those who use trade books to supplement and enhance health science creative writing history geography reading math language arts character education multicultural studies holidays citizenship and the fine arts It s for those who love children s literature and book illustration With this book you no longer need to get lost in cyberspace The information has already been searched collected assessed and compiled Easily accessible and at your fingertips this directory can help you to get biographical information about authors and illustrators and to learn how they get ideas for stories how illustrations are created how to extend the books into the curriculum and where to find time saving lesson plans and book related activities for classroom projects and units These outstanding websites of children s authors illustrators and storybook characters were selected based on their educational value and for the fact that they contain a minimum of commercialization They are exemplary examples of authors publishers and scholars who understand and acknowledge the roles of teachers and librarians Like little gems in cyberspace they go beyond the ordinary content for busy educators
