Poison Ivy Evan Mandery, 2025-03-18 Hailed as a staggering portrait of inequality in America Philip Dray Poison Ivy tells the bigger seedier story of how elite colleges create paths to admission available only to the wealthy despite rhetoric to the contrary In a lively and trenchant Washington Monthly account Evan Mandery a Harvard graduate and current professor at a public college that serves low and middle income students reveals how tacit agreements between exclusive Ivy plus schools and white affluent suburbs create widespread de facto segregation And as a college degree continues to be the surest route to upward mobility the inequality bred in our broken higher education system is now a principal driver of skyrocketing income inequality Mandery contrasts the lip service paid to opportunity by so many elite colleges and universities with schools that actually walk the walk Now in an accessible paperback format Poison Ivy is a no holds barred takedown Forbes that synthesizes fascinating insider information on everything from how students are evaluated unfair tax breaks and questionable fundraising practices to suburban rituals testing tutoring tuition schemes and more This bold provocative indictment of America's elite colleges shows us exactly what's at stake and what will be possible if we muster the collective will to transform it

Craven, 2017-03-01 Increasing numbers of children and adolescents internationally are being diagnosed with secondary health problems e.g. overweight obesity diabetes asthma anxiety etc due in part or at least related to a lack of physical activity Children and adolescents with various forms of special needs for example children and adolescents with physical or intellectual disabilities children and adolescents from disadvantaged social backgrounds and children and adolescents with chronic illnesses seem to be particularly at risk for secondary health problems which in the end limit their social participation and inclusion as well as their ability to achieve their full potential and to lead happy and fulfilling lives For these children and adolescents involvement in regular physical activities including fitness activities and sports may have far reaching benefits For instance organized physical activities are known to represent an effective vehicle for interventions for children and adolescents with special needs who do not seem to benefit as much as others from more traditional verbal oriented approaches Organized physical activities in or out of school further provide these children and adolescents with opportunities

to interact in a positive manner with prosocial peers and adults who may serve as positive role models for them There is currently a paucity of research about physical activities that effectively include children and adolescents with a range of special needs or research that identifies evidence based strategies that seed success in maximizing the involvement in and the positive biopsychosocial outcomes associated with the practice of physical activity This dearth of research is impeding progress in addressing the biopsychosocial disadvantage that these children and adolescents encounter the development of new solutions for enabling full potential and ensuring that children and adolescents with special needs not only succeed but also flourish in life This volume includes examples of theory research policy and practice that will advance our understanding of how best to encourage these children and adolescents to participate regularly in physical activity how to maximize the biopsychosocial benefits of involvement in physical activities and how to ensure that these physical activities are inclusive for children and adolescents with special needs The focus will be placed on research derived physical activity practices that seed success for children and adolescents with special needs and new directions in theory research and practice that have implications for enhancing physical activity practices with at risk children and adolescents The themes covered in this volume include Strategies to maximise participation of children and adolescents with special needs in physical activity as a global priority Strategies to maximise the social inclusion of children and adolescents with special needs in general physical activities Effective physical education strategies to enhance biopsychosocial outcomes for children and adolescents with special needs Advancing the practice of educators and coaches to cultivate the social inclusion and participation in physical activity of children and adolescents with special needs and Challenging the meaning and implementation of inclusive practices in physical education globally
