fields including educational psychology child psychopathology and forensic developmental psychology Developmental psychology complements several other basic research fields in psychology including social psychology cognitive psychology ecological psychology and comparative psychology Developmental psychology as a discipline did not exist until after the industrial revolution when the need for an educated workforce led to the social construction of childhood as a distinct stage in a person's life The notion of childhood originates in the western world and this is why the early research derives from this location Initially developmental psychologists were interested in studying the mind of the child so that education and learning could be more effective A significant issue in developmental psychology is the relationship between innateness and environmental influence in regard to any particular aspect of development The book will be of use to the students researchers and general readers of this subject

This book gives you a better understanding of the most frequently encountered developmental and acquired disabilities seen in the eye care practitioner's office. These disabilities include patients with autism, brain injury, Fragile X syndrome, and Down syndrome, as well as those with psychiatric illness, dual diagnosis, and more. The text discusses in great detail the visual issues inherent in these populations and their possible treatment. A group of authors with approximately 500 years of experience in the field of eye care and special populations have been brought together to develop this comprehensive reference. The authors handle complex topics in a highly accessible manner, explaining how to put theory into practice. In three lucidly argued sections, they present an overview of the work of key theorists and thinkers including Vygotsky, Piaget, Freud, Erikson, Bruner, and the Korning theorists; an evaluation of the educational implications of the work of each theorist using illustrative case studies; a consideration of areas of development in learning and teaching children with special educational needs.
