**The Five Practices in Practice [High School]** Margaret (Peg) Smith, Michael D. Steele, Miriam Gamoran Sherin, 2020-02-26 This book makes the five practices accessible for high school mathematics teachers. Teachers will see themselves and their classrooms throughout the book. High school mathematics departments and teams can use this book as a framework for engaging professional collaboration. I am particularly excited that this book situates the five practices as ambitious and equitable practices. Robert Q. Berry III, NCTM President 2018-2020. Samuel Braley Gray, Professor of Mathematics Education, University of Virginia. Take a deeper dive into understanding the five practices: anticipating, monitoring, selecting, sequencing, and connecting, for facilitating productive mathematical conversations in your high school classrooms and learn to apply them with confidence. This follows up to the modern classic *5 Practices for Orchestrating Productive Mathematics Discussions*, which shows the five practices in action in high school classrooms and empowers teachers to be prepared for and overcome the challenges common to orchestrating math discussions. The chapters unpack the five practices and guide teachers to a deeper understanding of how to use each practice effectively in an inquiry-oriented classroom. This book will help you launch meaningful mathematical discussion through key questions to set learning goals, identify high-level tasks, anticipate student responses, and develop targeted assessing and advancing questions that jumpstart productive discussion before class begins. Video excerpts from real high school classrooms vividly illustrate the five practices in action and include built-in opportunities for you to consider effective ways to monitor students' ideas and successful approaches for selecting, sequencing, and connecting students' ideas during instruction. Pause and Consider prompts that help you reflect on an issue and, in some cases, draw on your own classroom experience prior to reading more about it. Linking To Your Own Instruction sections help you implement the five practices with confidence in your own instruction. The book and companion website provide an array of resources, including planning templates, sample lesson plans, completed monitoring tools, and mathematical tasks. Enhance your fluency in the five practices to bring powerful discussions of mathematical concepts to life in your classroom.

## **Assessing Middle and High School Mathematics & Science**

Sheryn Spencer-Waterman, 2013-08-16 For middle and high school teachers of mathematics and science, this book is filled with examples of instructional strategies that address students' readiness levels, interests, and learning preferences. It shows teachers how to formatively assess their students by addressing differentiated learning targets. Included are detailed examples of differentiated formative assessment schedules, plus tips on how to collaborate with others to improve assessment processes. Teachers will learn how to adjust instruction for the whole class, for small groups, and for individuals. They will also uncover step-by-step procedures for creating their own lessons infused with opportunities to formatively assess students who participate in differentiated learning activities.

Tate, 2024-08-26 Create unforgettable learning experiences for your students. What can you do when students would rather socialize than pay attention to your lesson? When students appear to lack motivation, how do teachers ensure that learning sticks? How can you best respond to learning loss caused by the pandemic? In this new edition of Marcia Tate's wildly bestselling **Worksheets Don't Grow Dendrites**, 20 field-tested, brain-compatible instructional strategies designed to maximize memory are supported by new classroom applications and research. In each chapter devoted to an individual strategy, you'll discover the latest research on how the brain benefits when the strategy is used. How the strategy engages all students and addresses common behavior problems. Sample classroom activities for various grade levels that teachers can implement immediately. Action plans for incorporating each strategy to accelerate learning. When students actively engage in learning, they stand a much better chance of retaining what we want them to know. As students face setbacks and learning gaps, it's imperative that we quickly bridge these divides by teaching them in the way their brains learn best. Handbook of Test Development Thomas M.
