borrowed many tools from aviation to improve safety such as simulation training limitation of working time use of checklists and so forth All these tools contribute to improving human factors in healthcare Often due to the lack of communication between professionals healthcare accidents are avoidable The only solution is the standardization of communication through phraseology But make no mistake the subject of communication is vast and much more complex to teach than we imagine Communication is not only an exchange of words of meaning of a sender receiver scheme it also carries the essence of all social and cooperative life by its tone by its moment by the listening and availability it demands from the other person by the words chosen by those not said voluntarily and those referred to as tacit what we no longer need to say but the other guesses The Medical Phraseology Guide for Superior Patient Safety How to Improve Communications Between Caregivers through concrete and proven examples gives readers the keys to improve communication with their healthcare colleagues The author proposes 26 rules that are detailed and easy applicable in everyday life These rules are inspired by the tools and checklist developed and used by commercial airline pilots Today more than ever caregivers face new situations and they have to adapt to caring for an unusual number of patients sometimes in new environments Given this new environment it becomes clear that teamwork and communication are indispensable tools for improving efficiency and safety in patient care Subject
