Karl Marx and Mathematics Pradip Baksi, 2020-11-01 This collection of various texts on Karl Marx and Mathematics is the revised and extended second edition of the Special Supplement to Karl Marx Mathematical Manuscripts 1994 Calcutta Viswakos titled Marx and Mathematics The sources of the texts included in the three parts of this collection and some biographical information about their respective authors have been indicated at the end of each text The emergence and development of the Ethnomathematics movement continue to change our understanding of the history of evolution of plural mathematics on planet earth since the Neolithic age Rediscovery and study of some of the neglected source texts have further energized investigations on the subsequent history of mathematical cultures including those on the histories of algebra and analysis in some of the ancient and medieval languages of Asia like Sanskrit Arabic and Malayalam Consequently it is now possible to indicate some of the larger gaps in the dominant understanding of history of mathematics not only in Marx's time but also at the time of editing Marx's mathematical manuscripts in the twentieth century and even today Finally the emergence and development of mathematical and statistical software packages are vigorously reshaping our ways of conceptualizing and doing mathematics towards an unknown future It is time now for taking yet another look at all mathematical text from the past and that includes the mathematical manuscripts of Marx These texts have been divided into three parts Part one contains some topical texts related to the history of emergence development editing publication and reception of the mathematical manuscripts of Karl Marx Part two contains a selection of five articles reflecting some of the investigations inspired by these manuscripts in Russia India and France Part three contains five articles on plural mathematics before and after Karl Marx 1818-1883 The texts in this collection are followed by two appendices containing two bibliographies one on Hegel and mathematics and the other on mathematics and semiotics Please note This title is co published with Aakar Books New Delhi Taylor Francis does not sell or distribute the print edition in South Asia India Sri Lanka Nepal Bangladesh Pakistan Maldives or Bhutan

Pi: The Next Generation David H. Bailey, Jonathan M. Borwein, 2016-07-19 This book contains a compendium of 25 papers published since the 1970s dealing with pi and associated topics of mathematics and computer science The collection begins with a Foreword by Bruce Berndt Each contribution is preceded by a brief summary of its content as well as a short key word list indicating how the content relates to others in the collection The volume includes articles on actual computations of pi articles on mathematical questions related to pi e.g. Is pi normal articles presenting new and often amazing techniques for computing digits of pi e.g. the BBP algorithm for pi which permits one to compute an arbitrary binary digit of pi without needing to compute any of the digits that came before papers presenting important fundamental mathematical results relating to pi and papers presenting new high tech techniques for

analyzing pi i e new graphical techniques that permit one to visually see if pi and other numbers are normal This volume is a companion to Pi A Source Book whose third edition released in 2004 The present collection begins with 2 papers from 1976 published by Eugene Salamin and Richard Brent which describe quadratically convergent algorithms for pi and other basic mathematical functions derived from some mathematical work of Gauss Bailey and Borwein hold that these two papers constitute the beginning of the modern era of computational mathematics This time period 1970s also corresponds with the introduction of high performance computer systems supercomputers which since that time have increased relentlessly in power by approximately a factor of 100 000 000 advancing roughly at the same rate as Moore s Law of semiconductor technology This book may be of interest to a wide range of mathematical readers some articles cover more advanced research questions suitable for active researchers in the field but several are highly accessible to undergraduate mathematics students

Dynamical Systems and Methods Albert C. J. Luo, José António Tenreiro Machado, Dumitru Baleanu, 2011-09-30 Nonlinear Systems and Methods For Mechanical Electrical and Biosystems presents topics observed at the 3rd Conference on Nonlinear Science and Complexity NSC focusing on energy transfer and synchronization in hybrid nonlinear systems The studies focus on fundamental theories and principles analytical and symbolic approaches computational techniques in nonlinear physical science and mathematics Broken into three parts the text covers Parametrical excited pendulum nonlinear dynamics in hybrid systems dynamical system synchronization and N 1 body dynamics as well as new views different from the existing results in nonlinear dynamics mathematical methods for dynamical systems including conservation laws dynamical symmetry in nonlinear differential equations and invex energies and nonlinear phenomena in physical problems such as solutions complex flows chemical kinetics Toda lattices and parallel manipulator This book is useful to scholars researchers and advanced technical members of industrial laboratory facilities developing new tools and products

Intelligent Computer Mathematics Serge Autexier, Jacques Calmet, David Delahaye, P.D.F. Ion, Laurence Rideau, Renaud Rioboo, Alan Sexton, 2010-06-29 This book constitutes the joint refereed proceedings of the 10th International Conference on Artificial Intelligence and Symbolic Computation AISC 2010 the 17th Symposium on the Integration of Symbolic Computation and Mechanized Reasoning Calculemus 2010 and the 9th International Conference on Mathematical Knowledge Management MKM 2010 All submissions passed through a rigorous review process From the 25 papers submitted to AISC 2010 9 were selected for presentation at the conference and inclusion in the proceedings volume A total of 14 papers were submitted to Calculemus of which 7 were accepted MKM 2010 received 27 submissions of which 16 were accepted for presentation and publication The events focused on the use of AI techniques within symbolic computation and the application of symbolic computation to AI problem solving the combination of computer algebra systems and automated deduction systems and mathematical knowledge management respectively

Digital Technologies in the Lives of Young People Chris Davies, John Coleman, Sonia Livingstone, 2015-10-14 This book examines the

presence and effects of new technologies in the lives of young people The rapid pace of change in the development and use of digital technologies and the likely impact this has on youth means that the topic has wide implications for educational institutions theory and practice There is a demand for a concentration on the ways in which new devices such as smart phones and tablets as well as new platforms and recent notions such as the flipped classroom are affecting the way education is being provided However there is also still a small minority who do not have full access to the internet and the disadvantages suffered by this group must also be addressed The internet offers a vast range of opportunities for young people and yet for various reasons it is not always available This can partly be attributed to the controls that schools impose on the use of digital technology for reasons of safety and security and can in part be explained by the fact that policy makers have contradictory attitudes to technology While they may argue for the need to have a well educated and well trained workforce they fear the threats to privacy and safety posed by the internet This book asserts that society needs to have more open debate about the threats and opportunities of digital technology as it is a dynamic and ever changing topic for us all This book was originally published as a special issue of the Oxford Review of Education
