Numerical study of coupled THM/C processes related to geo-energy production Yang Gou, 2018-06-20 In this thesis a parallel simulation platform namely TOUGH2MP FLAC3Dplus was further developed by linking the multiphase multicomponent flow code TOUGH2MP and the further developed geomechanical code FLAC3Dplus for large scale simulation of the coupled THM/C processes related to geo energy production A series of mathematical physical models were developed and implemented in this platform including 1 an improved equation of state for CO₂ CH₄ H₂O NaCl system which considers the effect of salt on phase partition and fluid properties in gas reservoirs 2 a modified coupling approach for the simulation of hydraulic fracturing in

tight geo reservoirs which considers the multiphase multicomponent leakoff effects 3 a thermo hydro mechanical model based on a crack tensor for naturally fractured rock masses and faults All these verified models have been applied in three different case studies including CO₂ enhanced gas recovery EGR in the Altmark natural gas field 2 Hydraulic fracturing in three different types of geo reservoirs tight gas oil and geothermal reservoir 3 Geothermal energy utilization induced seismicity in Unterhaching The developed models and the numerical platform can be used to predict the coupled THM C behavior of rock formations to optimize the CO₂ EGR and hydraulic fracturing in tight geo reservoirs as well as reduce the geo risks related to geo energy production International Journal of Engineering Research in Africa Vol. 26 Akii Okonigbon Akaehomen Ibhado, 2016-10-07 In this issue of journal International Journal of Engineering Research in Africa are collected articles which describe the results of engineering solutions of actual problems in mechanical engineering and processing technologies researching and designing of machines in the practice the designing of the communication systems and construction and engineering management of modern production Published articles will be useful for professionals from field of mechanical engineering students and academic teachers of the related specialties
