

INTRODUCTION

The Becho-Voice Model BHD Diffraction Horn is an experimentally derived horn designed for use with recommended audio driver units such as the Becho-Voice Models T202 and T214.

GENERAL DESCRIPTION

The Model BHD unit employs the diffraction principle in combination with the extreme exponential flare to provide smooth and adequate dispersion of the "pressure" or "baffle" range. The result is a "spread" of sound that affords adequate coverage of the entire listening area—this is especially important in stereophonic installations. The BHD horn is of rugged direct construction and is finished to an isolation grade black to insure "clean-through". The horn is designed for crossover at 400 cps with an appropriate crossover network such as the Becho-Voice Model RN, which horn cutoff is 600 cps. This overlap eliminates disturbances often caused by operating horn crossover points too close to cutoff points.

RECOMMENDATIONS FOR USE

The BHD horn is recommended for use with all Becho-Voice audio drivers, but will enhance the performance of alternate drivers with a throat which will accept a 3-5/8" x 18 driver.
