**Collaborative Leadership and Innovation** Elis Carlström, 2022-09-19 Original ideas start in a person's mind but the environment where they operate is crucial for the capture and development of these ideas. Equally important is the interaction with others in developing and evaluating ideas as a brilliant idea only influences the world if it is put into use. This book hopes to inspire the team leader, innovation manager, or research group leader. It deals with the delicate balance of managing and controlling intellectual property in a collaborative environment. Insights on how new inventions can be evaluated are offered. Following the whole cycle of innovation from a creative idea to where a product or service can be put on the market, examples illustrate how an innovative environment can be created and maintained. Strategies and solutions based on the science of team development are presented, and leadership models for the different phases of group development are provided. The book will be of interest to researchers, academics, product developers, entrepreneurs, and advanced students in the fields of technology and innovation management and entrepreneurship and small business management but also for leadership.
