**Recent Advances in Engineering Science** Severino L. Koh, Charles G. Speziale, 2012-12-06 The 25th Anniversary Meeting of the Society of Engineering Science was held as a joint conference with the Applied Mechanics Division of the American Society of Mechanical Engineers at the University of California Berkeley from June 20 22 1988 With the encouragement and support of the SES we decided to organize a symposium in honor of A C Eringen the founding president of the Society of Engineering Science who provided pioneering leadership during the critical first decade of the Society's existence We felt that there was no better way to do this than with a Symposium on Engineering Science the field that A C Eringen has devoted his life to Professor Eringen had the foresight even in his own early work to see the need for an intimate amalgamation of engineering and science transcending the bounds of the traditional engineering disciplines to address unsolved problems of technological importance Sustained by the belief that there was the need to provide a forum for researchers who had embraced this broader interdisciplinary approach Professor Eringen founded the Society of Engineering Science and the International Journal of Engineering Science in 1963 Since that time he has made countless contributions to the advancement of engineering science through his research educational and organizational activities The participants in the Symposium were former students and colleagues of Professor Eringen who have been strongly influenced by his professional activities and research in engineering science

**Giants of Engineering Science** O. Anwar Bég, 2003 Giants of Engineering Science is a biographical monograph examining the life and works of ten of the world's leading engineering scientists

**Cassier's Engineering Monthly**, 1915 International Benchmarking of U.S. Chemical Engineering Research Competitiveness National Research Council, Division on Earth and Life Studies, Board on Chemical Sciences and Technology, Panel on Benchmarking the Research Competitiveness of the U.S. in Chemical Engineering, 2007-08-12 More than 400 billion worth of products rely on innovations in chemistry Chemical engineering as an academic discipline and profession has enabled this achievement In response to growing concerns about the future of the discipline International Benchmarking of U S Chemical Engineering Research Competitiveness gauges the standing of the U S chemical engineering enterprise in the world This in depth benchmarking analysis is based on measures including numbers of published papers citations trends in degrees conferred patent productivity and awards The book concludes that the United

States is presently and is expected to remain among the world's leaders in all subareas of chemical engineering research. However, U.S. leadership in some classical and emerging subareas will be strongly challenged. This critical analysis will be of interest to practicing chemical engineers, professors and students in the discipline, economists, policy makers, major research university administrators and executives in industries dependent upon innovations in chemistry.
