Environmental Science introduces students to the Earth's physical and biological systems and the interactions of humans with these. This revision introduces new content and aligns the workbook to its supporting digital resources. Content developments include updates on the Gulf of Mexico oil spill and the Fukushima Daiichi nuclear disaster and in-depth coverage of energy extraction issues, pollution and the wider environmental implications of urban development. The ideal companion to both the APES curriculum and the IB Environmental Systems and Societies. *The School Science Review*, 2007
