High performance photo, film and document scanning have reached new levels with the EPSON PERFECTION 3170 PHOTO. Through a unique combination of EPSON's advanced technologies and applications, this scanner delivers amazing results – with incredible ease.

Professional Film Scanning

Professional photographers, archivists, and anyone requiring high performance film scanning can rely on the professional film scanning capabilities of the PERFECTION 3170 PHOTO. Its integrated Transparency Unit (TPU) features new powerful lamps for faster scanning speeds. To make film and negative scanning even easier, the PERFECTION 3170 PHOTO includes three film holders, which support:

- 35mm slide film x 12 frames
- 35mm x 4 slides mounted film
- Medium format (120/220) (up to 6 x 9cm) x 1 frame strip film

When used in conjunction with the EPSON Scan Software/Driver, each film frame can automatically be saved as a separate image film. The TPU also provides storage for two separate film holders.

EPSON Scan

With the introduction of the newly developed EPSON Scan Software/Driver, users of the EPSON PERFECTION 3170 PHOTO benefit from a high performance, flexible driver that functions also as a stand alone application. By featuring three separate user modes – Full Auto mode, Home mode and Professional mode – EPSON Scan can be dynamically changed to reflect the scanning level requirements of all users, from novice to professional. Some of the new features in the professional mode are Multi-marquee, Histogram, Multiple-level Unsharp Mask and Multiple-level Descreening. As a single software/driver solution EPSON Scan can automatically save scanned images to file in a variety of standard formats.

Photo Restoration

Adding the new EPSON Scan tools are Colour Restoration and Dust Removal. Designed specifically for high quality photo and film scanning, Colour Restoration employs sophisticated technology to automatically restore image colour that has been subjected to fading and other colour loss influences, such as light and airborne contaminants. With the Dust Removal feature, EPSON Scan automatically detects dust on film or negative, and then makes the necessary adjustments.

High Image Quality and High Resolution

Professional users demand high image quality and high resolution. The PERFECTION 3170 PHOTO combines advanced technologies to consistently deliver stunning results. It features an advanced 3200dpi main scanning ability, which is achieved by utilising a MatrixCCD (Charge Coupled Device) and a new Micro Lens. The use and precise positioning of these devices combine to deliver superb light sensitivity that is critical if high performance scanning, without the need for a large carriage. Also included is a dedicated ASIC (Application Specific Integrated Circuit) for on-board image processing. Adding further to the ground-breaking scanning performance of the PERFECTION 3170 PHOTO is that the optical carriage is driven at 6400dpi using EPSON's Micro Step Drive dual scanning technology.

Automatic Document Feeder (Optional Extra)

A high performance option to the PERFECTION 3170 PHOTO is its Automatic Document Feeder (ADF), which supports automatic document scanning of documents up to legal size. With an added capacity of up to 30 sheets and document scanning speed of 4.5ppm, the PERFECTION 3170 PHOTO represents an entirely new level of desktop scanning professionalism.

EPSON Smart Panel

As a result of its newly designed interface, the EPSON Smart Panel software represents a perfect balance between power and ease of use. Scanning to file, E-mail, OCR, multi-page PDF, Web, FCopy and even scanning business cards is little more than a mouse click away.

Business Card Scanning

New to the Smart Panel family of applets is NewSoft's Presto! BizCard 4.0LE. Combining OCR, database and integration technologies, this versatile software allows you to scan business cards which are automatically converted and stored in an easy to search database. You can even synchronise with and export to industry standard desktop applications.

PRINT Image Matching II Technology

Incorporated into the EPSON Smart Panel software is PRINT Image Matching (P.I.M.) II. With P.I.M. II, you can select from 11 different photo scenery types with which to optimise your image. Simply select the scene type that you are scanning and P.I.M. II will apply varied image adjustments to give you the best quality image possible.
