*Recent Innovations in Computing* Pradeep Kumar Singh, Yashwant Singh, Maheshkumar H. Kolekar, Arpan Kumar Kar, Jitender Kumar Chhabra, Abhijit Sen, 2021-01-12 This book features selected papers presented at the 3rd International Conference on Recent Innovations in Computing ICRIC 2020 held on 20-21 March 2020 at the Central University of Jammu India and organized by the university s Department of Computer Science Information Technology It includes the latest research in the areas of software engineering cloud computing computer networks and Internet technologies artificial intelligence information security database and distributed computing and digital India **Optical and Wireless Technologies** Manish Tiwari, Ravi Kumar Maddila, Amit Kumar Garg, Ashok Kumar, Preecha Yupapin, 2021-09-01 This book comprises select proceedings of the 4th International Conference on Optical and Wireless Technologies OWT 2020 The contents of this volume focus on research carried out in the areas of Optical Communication Optoelectronics Optics Wireless Communication Wireless Networks Sensors Mobile Communications and Antenna and Wave Propagation The volume also explores the

combined use of various optical and wireless technologies in next generation applications and their latest developments in applications like photonics high speed communication systems and networks visible light communication nanophotonics wireless and MIMO systems This book will serve as a useful reference to scientists academicians engineers and policy makers interested in the field of optical and wireless technologies      Perturbations, Optimization, and Statistics Tamir Hazan, George Papandreou, Daniel Tarlow, 2023-12-05 A description of perturbation based methods developed in machine learning to augment novel optimization methods with strong statistical guarantees In nearly all machine learning decisions must be made given current knowledge Surprisingly making what is believed to be the best decision is not always the best strategy even when learning in a supervised learning setting An emerging body of work on learning under different rules applies perturbations to decision and learning procedures These methods provide simple and highly efficient learning rules with improved theoretical guarantees This book describes perturbation based methods developed in machine learning to augment novel optimization methods with strong statistical guarantees offering readers a state of the art overview Chapters address recent modeling ideas that have arisen within the perturbations framework including Perturb MAP herding and the use of neural networks to map generic noise to distribution over highly structured data They describe new learning procedures for perturbation models including an improved EM algorithm and a learning algorithm that aims to match moments of model samples to moments of data They discuss understanding the relation of perturbation models to their traditional counterparts with one chapter showing that the perturbations viewpoint can lead to new algorithms in the traditional setting And they consider perturbation based regularization in neural networks offering a more complete understanding of dropout and studying perturbations in the context of deep neural networks      **Hardware IP Security and Trust** Prabhat Mishra, Swarup Bhunia, Mark Tehranipoor, 2017-01-02 This book provides an overview of current Intellectual Property IP based System on Chip SoC design methodology and highlights how security of IP can be compromised at various stages in the overall SoC design fabrication deployment cycle Readers will gain a comprehensive understanding of the security vulnerabilities of different types of IPs This book would enable readers to overcome these vulnerabilities through an efficient combination of proactive countermeasures and design for security solutions as well as a wide variety of IP security and trust assessment and validation techniques This book serves as a single source of reference for system designers and practitioners for designing secure reliable and trustworthy SoCs      *Controlling the Message* Victoria A. Farrar-Myers, Justin S. Vaughn, 2015-03-27 Broken down into sections that examine new media strategy from the highest echelons of campaign management all the way down to passive citizen engagement with campaign issues in places like online comment forums the book ultimately reveals that political messaging in today s diverse new media landscape is a fragile unpredictable and sometimes futile process The result is a collection that both interprets important historical data from a watershed campaign season and also explains myriad approaches to political campaign media scholarship      *Evolutionary Optimization*

*Algorithms* Dan Simon, 2013-06-13 A clear and lucid bottom up approach to the basic principles of evolutionary algorithms Evolutionary algorithms EAs are a type of artificial intelligence EAs are motivated by optimization processes that we observe in nature such as natural selection species migration bird swarms human culture and ant colonies This book discusses the theory history mathematics and programming of evolutionary optimization algorithms Featured algorithms include genetic algorithms genetic programming ant colony optimization particle swarm optimization differential evolution biogeography based optimization and many others Evolutionary Optimization Algorithms Provides a straightforward bottom up approach that assists the reader in obtaining a clear but theoretically rigorous understanding of evolutionary algorithms with an emphasis on implementation Gives a careful treatment of recently developed EAs including opposition based learning artificial fish swarms bacterial foraging and many others and discusses their similarities and differences from more well established EAs Includes chapter end problems plus a solutions manual available online for instructors Offers simple examples that provide the reader with an intuitive understanding of the theory Features source code for the examples available on the author's website Provides advanced mathematical techniques for analyzing EAs including Markov modeling and dynamic system modeling Evolutionary Optimization Algorithms Biologically Inspired and Population Based Approaches to Computer Intelligence is an ideal text for advanced undergraduate students graduate students and professionals involved in engineering and computer science Spiralchain: Mindshaper Jeremiah L. Schwennen, 2013-12-22 Every day the people in our life try to define us but do they really know who we are Tatyana Harper is a college student with a complicated past and a future that she will do anything to assure Six months ago her world was turned upside down when she discovered she was a Mindshaper one of the very few in all creation able to connect with and manipulate the minds of those around her Drawn into the struggle between the others like her the Children of the Line and the monstrous Obliviates that lurk in the shadows of her world she must confront the echoes of her own past and determine who she is going to be Tatyana and her friends must travel to an unknown world in search of the technology that will end this war but what cost will this journey demand of her Of all of them Mindshaper is Book 2 in the Spiralchain **Emerging Technologies for Securing the Cloud and IoT** Ahmed Nacer, Amina, Abdmeziem, Mohammed Riyadh, 2024-04-01 In an age defined by the transformative ascent of cloud computing and the Internet of Things IoT our technological landscape has undergone a revolutionary evolution enhancing convenience and connectivity in unprecedented ways This convergence while redefining how we interact with data and devices has also brought to the forefront a pressing concern the susceptibility of these systems to security breaches As cloud services integrate further into our daily lives and the IoT saturates every aspect of our routines the looming potential for cyberattacks and data breaches necessitates immediate and robust solutions to fortify the protection of sensitive information ensuring the privacy and integrity of individuals organizations and critical infrastructure Emerging Technologies for Securing the Cloud and IoT emerges as a comprehensive and timely solution to address the multifaceted security

challenges posed by these groundbreaking technologies Edited by Amina Ahmed Nacer from the University of Lorraine France and Mohammed Riyadh Abdmeziem from Ecole Nationale Sup rieur d Informatique Algeria this book serves as an invaluable guide for both academic scholars and industry experts Its content delves deeply into the intricate web of security concerns elucidating the potential ramifications of unaddressed vulnerabilities within cloud and IoT systems With a pragmatic focus on real world applications the book beckons authors to explore themes like security frameworks integration of AI and machine learning data safeguarding threat modeling and more Authored by esteemed researchers practitioners and luminaries each chapter bridges the divide between theory and implementation aiming to be an authoritative reference empowering readers to adeptly navigate the complexities of securing cloud based IoT systems A crucial resource for scholars students professionals and policymakers striving to comprehend confront and surmount contemporary and future security challenges this book stands as the quintessential guide for ushering in an era of secure technological advancement
