Independent Schools Yearbook 2012-2013 none, 2013-06-20 The highly respected book of reference of sought after Independent Schools in membership of the Independent Schools Council s Associations HMC GSA The Society of Heads IAPS ISA and COBIS **The Rise and Fall of Civic Education** Michael Learn, 2024-09-16 Social studies is a field in crisis The crisis stems from failure to establish the very foundation of social studies purpose in public education civic education Social studies advocates have never put forth a coherent method for teaching civic education because policymakers and the public have been unable to agree upon a general definition of civic education This issue has disrupted the field since the early days As educators sought to include civic education within public schools as a dedicated field social studies evolved into a blending of history social sciences and civic education Social studies evolution never resolved the differences between the three with each discipline striving to control the narrative Instead of creating a unified field the disciplines devalued social studies and thus any discipline associated with it **The Rise and Fall of Civic Education** **The Battle for Social Studies in a Shifting Historical Landscape** investigates the changing definitions and purposes ascribed to social studies in the United States through time This result is viewed through the rising tensions from culture wars as America s divisive politics fight to control the narrative of the disciplines within social studies **A University Education** David Willetts, 2017-11-17

Universities have a crucial role in the modern world In England entrance to universities is by nation wide competition which means English universities have an exceptional influence on schools a striking theme of the book This important book first investigates the university as an institution and then tracks the individual on their journey to and through university In **A University Education** David Willetts presents a compelling case for the ongoing importance of the university both as one of the great institutions of modern society and as a transformational experience for the individual The book also makes illuminating comparisons with higher education in other countries especially the US and Germany Drawing on his experience as UK Minister for Universities and Science from 2010 to 2014 the author offers a powerful account of the value of higher education and the case for more expansion He covers controversial issues in which he was involved from access for disadvantaged students to the introduction of 9 000 fees The final section addresses some of the big questions for the future such as the the relationship between universities and business especially in promoting innovation He argues that the two great contemporary trends of globalisation and technological innovation will both change the university significantly This is an authoritative account of English universities setting them for the first time in their new legal and regulatory framework

British Columbia's Borders in Globalization Nicole Bates-Eamer, Helga Kristín Hallgrímsdóttir, 2021-11-24 This book is a case study collection examining the influences and functions of British Columbia s BC borders in the 21st century **British Columbia s Borders in Globalization** examines bordering processes and the causes and effects of borders in the Cascadian region from the perspective of BC The chapters cover diverse topics including historical border disputes and cannabis culture

and identity the governance of transboundary water flows migration and preclearance policies for goods and people and the emerging issue of online communities The case studies provide examples that highlight the simultaneous but contradictory trends regarding borders in BC while boundaries and bordering processes at the external borders shift away from the territorial boundary lines self determination local politics and cultural identities re inscribe internal boundaries and borders that are both virtual and real Moreover economic protectionism racial discourses and xenophobic narratives driven by advances in technology reinforce the territorial dimensions of borders These case studies contribute to the literature challenging the notion that territorial borders are sufficient for understanding how borders function in BC and in a few instances they illustrate the nuanced ways in which borders or bordering processes are becoming detached from territory The chapters in this book were originally published as a special issue of the Journal of Borderlands Studies **Testing**
