

Proving Triangles Congruent and CPCTC

The definition of congruent triangles states two triangles are congruent *if and only if* their corresponding parts are congruent. *If and only if* is used when both the conditional and its converse are true. Therefore the converse is true:

Corresponding parts of congruent triangles are congruent. (CPCTC)

This can be used to prove parts of triangles congruent by first proving the triangles congruent.

Examples: Justify the following using two column or flow proofs.

1. Prove: $\angle D = \angle B$

2. Prove: $\overline{EG} = \overline{JI}$

Teacher Notes:

1. Show triangles congruent by SSS and $\angle D = \angle B$ by CPCTC.
2. Show triangles congruent by AAS or HA and $\overline{EG} = \overline{JI}$ by CPCTC.
