Handbook of Research on Educational Communications and Technology J. Michael Spector, M. David Merrill, Jan Elen, M. J. Bishop, 2013-07-03 The 4th edition of the Handbook of Research on Educational Communications and Technology expands upon the previous 3 versions providing a comprehensive update on research pertaining to new and emerging educational technologies Chapters that are no longer pertinent have been eliminated in this edition with most chapters being completely rewritten expanded and updated Additionally new chapters pertaining to research methodologies in educational technology have been added due to expressed reader interest Each chapter now contains an extensive literature review documenting and explaining the most recent outstanding research including major findings and methodologies employed The Handbook authors continue to be international leaders in their respective fields the list is cross disciplinary by design and great effort was taken to invite authors outside of the traditional instructional design and technology community

Algebraic Geometry Dan Abramovich, 2009 The 2005 AMS Summer Institute on Algebraic Geometry in Seattle was an enormous event With over 500 participants including many of the world s leading experts it was perhaps the largest conference on algebraic geometry ever held These two proceedings volumes present research and expository papers by some of the most outstanding speakers at the meeting vividly conveying the grandeur and vigor of the subject The most exciting topics in current algebraic geometry research receive very ample treatment For instance there is enlightening information on many of the latest technical tools

from jet schemes and derived categories to algebraic stacks Numerous papers delve into the geometry of various moduli spaces including those of stable curves stable maps coherent sheaves and abelian varieties Other papers discuss the recent dramatic advances in higher dimensional birational geometry while still others trace the influence of quantum field theory on algebraic geometry via mirror symmetry Gromov Witten invariants and symplectic geometry The proceedings of earlier algebraic geometry AMS Institutes held at Woods Hole Arcata Bowdoin and Santa Cruz have become classics The present volumes promise to be equally influential They present the state of the art in algebraic geometry in papers that will have broad interest and enduring value

**Simulation-based Optimization Of Antenna Arrays** Slawomir Koziel,Stanislav Ogurtsov,2019-02-13 The book addresses surrogate assisted design of antenna arrays in particular how surrogate models both data driven and physics based can be utilized to expedite procedures such as parametric optimization design closure statistical analysis or fault detection Algorithms and design frameworks are illustrated using a large variety of examples including real world printed circuit antenna and antenna array structures This unique compendium contains introductory materials concerning numerical optimization both conventional gradient based and derivative free including metaheuristics and surrogate based as well as a considerable selection of customized procedures developed specifically to handle antenna array problems Recommendations concerning practical aspects of surrogate assisted multi objective antenna optimization are also given The methods presented allow for cost efficient handling of antenna array design problems involving CPU intensive EM models in the context of design optimization and statistical analysis which will benefit both researchers designers and graduate students
