Sentiment analysis has gained even more value with the advent and growth of social networking. Sentiment Analysis in Social Networks begins with an overview of the latest research trends in the field. It then discusses the sociological and psychological processes underling social network interactions. The book explores both semantic and machine learning models and methods that address context dependent and dynamic text in online social networks showing how social network streams pose numerous challenges due to their large scale short noisy context dependent and dynamic nature. Further this volume Takes an interdisciplinary approach from a number of computing domains including natural language processing machine learning big data and statistical methodologies Provides insights into opinion spamming reasoning and social network analysis Shows how to apply sentiment analysis tools for a particular application and domain and how to get the best results for understanding the consequences Serves as a one stop reference for the state of the art in social media analytics Takes an interdisciplinary approach from a number of computing domains including natural language processing big data and statistical methodologies Provides insights into opinion spamming reasoning and social network mining Shows how to apply opinion mining tools for a particular application and domain and how to get the best results for understanding the consequences Serves as a one stop reference for the state of the art in social media analytics *The Cambridge Review*, 1918 Vols 1 26 include a supplement The University pulpit vols 1 26 no 1 661 which has separate pagination but is indexed in the main vol

Completing the Circle David R. McMahill, 2003-01-01 On his second day as association minister for the United Church of Christ David McMahill received three phone calls from lay leaders who were looking for resources on how to evaluate our minister He knew of several churches in which a poorly constructed process for evaluating the ministers had

spun out of control however and had gradually come to believe it is probably better for a church not to attempt an evaluation process at all than to do one carelessly or to naively use a design intended for a secular organization Based on the needs he saw McMahaill began to work with numerous congregations looking for ways to review both leaders and ministries and developed the feedback reflection process he lays out in this book Based on sound principles of effective communication this simple system of asking for descriptive feedback about various aspects of a congregation s life together takes into account the specific setting and the unique relationship between minister and congregation *The Elevator Effect* Morgan L.
