Good To Great Report:

Good to Great Jim Collins, 2011-07-19 The Challenge Built to Last the defining management study of the nineties showed how great companies triumph over time and how long term sustained performance can be engineered into the DNA of an enterprise from the very beginning But what about the company that is not born with great DNA How can good companies mediocre companies even bad companies achieve enduring greatness The Study For years this question preyed on the mind of Jim Collins Are there companies that defy gravity and convert long term mediocrity or worse into long term superiority And if so what are the universal distinguishing characteristics that cause a company to go from good to great The Standards Using tough benchmarks Collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years How great After the leap the good to great companies generated cumulative stock returns that beat the general stock market by an average of seven times in fifteen years better than twice the results delivered by a composite index of the world's greatest companies including Coca Cola Intel General Electric and Merck The Comparisons The research team contrasted the good to great companies with a carefully selected set of comparison companies that failed to make the leap from good to great What was different Why did one set of companies become truly great performers while the other set remained only good Over five years the team analyzed the histories of all twenty eight companies in the study After sifting through mountains of data and thousands of pages of interviews Collins and his crew discovered the key determinants of greatness why some companies make the leap and others don't The Findings The findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice The findings include Level 5 Leaders The research team was shocked to discover the type of leadership required to achieve greatness The Hedgehog Concept Simplicity within the Three Circles To go from good to great requires transcending the curse of competence A Culture of Discipline When you combine a culture of discipline with an ethic of entrepreneurship you get the magical alchemy of great results Technology Accelerators Good to great companies think differently about the role of technology The Flywheel and the Doom Loop Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the leap Some of the key concepts discerned in the study comments Jim Collins fly in the face of our modern business culture and will quite frankly upset some people Perhaps but who can afford to ignore these findings **Hearings, Reports, Public Laws** United States. original perspective on the most important issues confronting today's practitioners and academics in the field of educational leadership. New and exciting concepts are introduced such as the research engaged school of the future. While its theoretical and evidence based approach raises to a robust level the discussion on the most important leadership challenges of the day, the book is at the same time intensely practical in addressing everyday issues faced by contemporary policy makers and school practitioners. Underpinning the eleven chapters is a conceptual framework founded on the notion of leadership as capacity building, giving the book a coherence that many others on school leadership lack. Among the themes actively discussed are Conceptualising and Contextualising Leadership, what is leadership? What distinguishes good from mediocre and poor leaders? What are the traits, dispositions and attributes that make for good leadership? How does context influence leadership? How appealing is leadership as a career? What are the components of capacity building leadership? Contemporary Leadership Themes: what is learning centred leadership and how can it best promote good teaching and student learning? How can leaders distribute leadership across the school and what are the pitfalls? How can leaders capitalise on the notion of the school as a professional learning community? How can leaders best be nurtured and developed? Policy Leadership Practice and Impact: what new forms of leadership are presaged by the specialist schools policy as a means of school improvement? How can schools combine a focus on academic achievement with the need to prepare students for the changing twenty first century workplace? Leadership Capacity Building and School Improvement provides an up to date authoritative critical and insightful account of school leadership. It combines advocacy and argument with evidence based practice drawn from the most plausible and robust sources. This book will prove a valuable tool for those taking higher degrees in school leadership and management, school leaders on NPQH courses and school practitioners as a whole interested in interfacing with the latest empirical evidence and ideas as well as academics teaching and researching in the area of educational leadership. Since the book adopts an international perspective drawing its examples and evidence from both the Anglo American and the Asian contexts, it will be found relevant to academics, policy makers and practitioners across these regions. Clive Dimmock is Visiting Professor at the National Institute of Education in Singapore and Professor Emeritus at the University of Leicester, UK.
