

### HESI Critical Thinking Questions and Answers

1. The nurse is working in the emergency department (ED) of a children's medical center. Which client should the nurse assess first?

Correct - 3-The child hit by a car should be assessed first because he or she may have life-threatening injuries that must be assessed and treated promptly.

2. The 8-year-old client diagnosed with a vaso-occlusive sickle cell crisis is complaining of a severe headache. Which intervention should the nurse implement first?

Correct - 2-Because the client is complaining of a headache, the nurse should first rule out cerebrovascular accident (CVA) by assessing the client's neurological status and then determine whether it is a headache that can be treated with medication.

3. The 6-year-old client who has undergone abdominal surgery is attempting to make a pinwheel spin by blowing on it with the nurse's assistance. The child starts crying because the pinwheel won't spin. Which action should the nurse implement first?

Correct - 1. The nurse should always praise the child for attempts at cooperation even if the child did not accomplish what the nurse asked.

4. The nurse is caring for clients on the pediatric medical unit. Which client should the nurse assess first?

Correct - 4. A pulse oximeter reading of less than 93% is significant and indicates hypoxia, which is life threatening; therefore, this child should be assessed first.

5. The nurse has received the a.m. shift report for clients on a pediatric unit. Which medication should the nurse administer first?
