General Introduction Alan Van Heuvelen, 1986 **Announcer** American Association of Physics Teachers, 2001 **Film & Video Finder**, 1997 **American Book Publishing Record**, 2001 Collected Papers of Carl Wieman Carl Edwin Wieman, 2008 Carl Wieman's contributions have had a major impact on defining the field of atomic physics as it exists today. His ground breaking research has included precision laser spectroscopy using lasers and atoms to provide important table top tests of theories of elementary particle physics, the development of techniques to cool and trap atoms using laser light, particularly in inventing much simpler, less expensive ways to do this, the understanding of how atoms interact with one another and light at ultracold temperatures, and the creation of the first Bose-Einstein condensation in a dilute gas and the study of the properties of this condensate. In recent years he has also turned his attention to physics education and new methods and research in that area. This indispensable volume presents his collected papers with annotations from the author tracing his fascinating research path and providing valuable insight about the significance of the works. **American Journal of Physics**, 1977 The Science Teacher, 2000 SCC Library has 1964 cur **Illinois Chemistry Teacher**, 1999-03 El-Hi Textbooks in Print, 1981 **Physics** Art Hobson, 2007 For a one semester course in liberal arts physics Hobson has four unifying themes: How do we know, the significance of post-Newtonian physics, modern physics, energy, and the social context of physics. These themes become evident in the writing and pedagogy throughout the fourth edition.
