To: Parents and Teachers

As you introduce numbers 1 to 10, children will use ten frames, a type of visual organizer.

Ten frames help children see and begin to understand relationships among numbers.

You could ask your children questions like these:

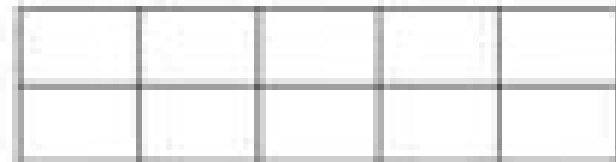

- How many red counters do you see?
- How many parts of the ten frame are covered?
- What number or quantity do you see?
- Or, how many empty spaces in the ten frame are there for the number ___?

They should answer your questions, and you could feedback them.

Pelton, This work is devoted to analyzing three major frames of justice group justice individual desert and life affirmation and their implications for social policy as well as their reflections in contemporary social policies Pelton finds that all three frames of justice are reflected in the Bible and later the Koran He contends that there is no evidence in the Bible of a genesis or development from one frame of justice to another Rather a sense of justice has existed in the human mind from time immemorial with the three frames coexisting and manifesting themselves in both inter and intra group relations The prominence of one frame over another at any particular point in history or in a particular geographical location is influenced by a variety of factors though it is ultimately open to human choice Pelton compares and contrasts the philosophies of nonviolence and liberalism in regard to the frames and explores the relationships between principle sentiment reason justice and policy He discusses social science s problematic relationship to justice in policymaking for instance how scholars have focused more on the effectiveness of policies largely in terms of statistical outcomes reflecting aggregate data analyses than on their justice He goes on to explore in depth how frames of justice give direction to social policies including those of genocide Frames of Justice is an outstanding work that analyzes the question of justice and social policy while simultaneously exploring the notion of desert in religion philosophy and legislation especially within the context of the moral question of the relationship between means and ends and contrasting it with the principle of life affirmation Leroy H Pelton is a professor in and former director of the School of Social Work University of Nevada Las Vegas and professor emeritus of the School of Social Work Salem State College Massachusetts He is the author of The Psychology of Nonviolence For Reasons of Poverty A Critical Analysis of the Public Child Welfare System in the United States and Doing Justice Liberalism Group Constructs and Individual Realities and the editor of The Social Context of Child Abuse and Neglect He has also written numerous journal articles on psychology social work child welfare and social policy *The Arithmetic Teacher* ,1984 *Marrow of Tragedy* Margaret Humphreys,2013-09-01 Soldiers lay wounded or sick as both sides struggled to get them fit to return to battle Winner George Rosen Prize American Association for the History of Medicine The Civil War was the greatest health disaster the United

The New Comparative Theology Francis X. Clooney, S.J., 2010-06-03 This book is an extended critical reflection on the state of interreligious dialogue in its modern version While there has been some important writing in the field of comparative theology there has been no extended critical reflection on the state of the discipline in its modern version its strengths and problematic areas as it grows as a serious theological and scholarly discipline This work of young scholars in conversation with one another remedies this lack by as it were taking the discipline apart and putting it back together again The volume seeks to understand how to learn from multiple religions in a way that is truly open to those religions on their own terms

while yet being rooted in the traditions that we bring to our interreligious study

The Myth of Mirror Neurons: The Real Neuroscience of Communication and Cognition Gregory Hickok, 2014-08-18 An essential reconsideration of one of the most far reaching theories in modern neuroscience and psychology In 1992 a group of neuroscientists from Parma Italy reported a new class of brain cells discovered in the motor cortex of the macaque monkey These cells later dubbed mirror neurons responded equally well during the monkey's own motor actions such as grabbing an object and while the monkey watched someone else perform similar motor actions Researchers speculated that the neurons allowed the monkey to understand others by simulating their actions in its own brain Mirror neurons soon jumped species and took human neuroscience and psychology by storm In the late 1990s theorists showed how the cells provided an elegantly simple new way to explain the evolution of language the development of human empathy and the neural foundation of autism In the years that followed a stream of scientific studies implicated mirror neurons in everything from schizophrenia and drug abuse to sexual orientation and contagious yawning In *The Myth of Mirror Neurons* neuroscientist Gregory Hickok reexamines the mirror neuron story and finds that it is built on a tenuous foundation a pair of codependent assumptions about mirror neuron activity and human understanding Drawing on a broad range of observations from work on animal behavior modern neuroimaging neurological disorders and more Hickok argues that the foundational assumptions fall flat in light of the facts He then explores alternative explanations of mirror neuron function while illuminating crucial questions about human cognition and brain function Why do humans imitate so prodigiously How different are the left and right hemispheres of the brain Why do we have two visual systems Do we need to be able to talk to understand speech What's going wrong in autism Can humans read minds *The Myth of Mirror Neurons* not only delivers an instructive tale about the course of scientific progress from discovery to theory to revision but also provides deep insights into the organization and function of the human brain and the nature of communication and cognition
