psychology books can be very vague and short on specific strategies to take control of your mental state while trading. Trading psychology shares equal importance with money management and the trading system and yet most traders remain unaware of the importance of taking into account their trading psychology when designing a trading system. What traders need is an unambiguous trader psychology system that can easily slot into whatever system they are trading and enable them to trade their system according to their trading plan. *Control Your Inner Trader* draws on the experience of an eight year trading veteran who is also a qualified therapist. Behavioral and therapeutic techniques are included in the book that is easy for anyone to follow. *Overcome Your Fear in Trading*. The most prevalent emotion facing traders is fear. Fear causes traders to exit trades too early ruining their equity curve. Fear causes traders to self sabotage so they can fulfill their self fulfilling prophecy of trading failure. Fear causes traders to find reasons to avoid taking trades that would have been winners. Fear causes traders to exit trades before they have a chance to get the move underway and then have the misery of seeing a profitable trade run away from them. There are many more destructive aspects to fear in trading and what is vital for the trader in order for them to succeed is to have a way of thinking about trading that eliminates fear from the trading process. *How to Stop Over Trading* is the latest book in the trading psychology series of books by L R Thomas. This book zeroes in on the specific reasons traders take trades outside their trading plan and offers simple solutions to stop over trading forever. The truth is that if a trader consistently trades outside their strategy even on a demo platform they are very unlikely to succeed in trading. If you are skewing your trading results by taking trades that you shouldn't then this book could change your trading for the better forever. *Patience*. Lack of patience also causes negative behaviors related to trading such as not bothering to back test the system, not keeping careful records and not doing an end of day or end of week analysis of trading results to find areas of improvement. The feeling of things not moving fast enough also causes traders to add too many trading systems to an already overloaded brain and not be able to focus properly on any one strategy to make it profitable. The profitability of the trading system is profoundly impacted by these types of behaviors and turns what is a money making system in theory into a loss making system in the real life. **The 10XROI Trading System** LR Thomas, 2024-06-01. If you are fed up with trading systems that promise the earth and fail to deliver then The 10XROI Trading System will not disappoint. A leading foreign exchange broker conducted a study that found that winning traders had something in common. Their wins were much larger than their losses. Many trading systems are designed to have lots of wins but that doesn't make them profitable they just appeal to the Holy Grail seeker who is looking for a trading system that never loses. By trading high probability trading strategies that give a very large risk reward ratio like The 10XROI Trading system you will automatically have a much higher chance of actually making a profit in the Forex markets. You may be an experienced trader who has already taken many trading courses or you may be just trying to decide on the best trading system for your personality and life circumstances. Written by a trader with over eight years of

experience in trading foreign currencies gold and futures this book is written in an easy to comprehend style with lots of illustrations and trading examples to help clarify each part of the system This trading strategy is simple and easy to follow and takes up a very small amount of time as it uses the daily and hourly time frames Unlike most day trading systems this makes it easy to trade around most jobs Most importantly it explains every part of the system including the correct trading psychology and money management which most systems leave out Recent Review Ever heard the expression buy low sell high Or how about let your winners run and cut your losses I especially like ensure your winners exceed your losses I just finished reading a book on the Quants whose mantra is to put the maths or the odds on your side Oh and I love the Jesse Livermore quote It never was my thinking that made the big money for me It always was my sitting Great Sayings Wonderful sayings Fantastic But my thinking most retail strategies do not capture most if any of these principles So is there a methodology that retail traders can use even with limited funds that captures all of this And I mean all of this I believe there is LR has put together a strategy that does as the big boys do focusses not on consistency of trades but consistency of the trader using a simple intuitive market rhythmic approach Of the strategy Does it Buy low Sell High Yes Are Winners run Losses cut Yes Do Winners exceed Losers Yes Is the Maths on your side Yes Do you Wait for trades to come to you Yes I have been trading the 10XROI strategy for just over a month now The last two weeks of trading has seen me bag over 1000 pips And yet that is not I repeat NOT the focus or what impresses me It is the rate of return Each trade aims for a take profit of 10R and always a stop loss of 1R which I have achieved While it s still early days for me I already know the principles taught are the principles practiced and espoused by the world s foremost traders There is no magic bullet Just sound time tested principles focussed on patience a simple strategy money management and sound psychology Why reinvent the wheel Just spin that thing Kevin

**Patience** LR Thomas, 2024-03-10 PATIENCE Why You Need to Read PATIENCE the latest in the series of Trading Psychology Made Easy books A recent reader survey demonstrated that one of the biggest trading psychology issues that traders face is related to their own inability to just sit and wait for the best time to take an action whether that be to enter a trade move a stop loss or wait for the planned take profit target This inability to simply wait leads to entering trades when there are no trades to take over trading exiting trades too early without allowing them time to develop and exiting trades before the take profit has been reached Lack of patience also causes other negative behaviours related to trading such as not bothering to back test the system not keeping careful records and not doing an end of day or end of week analysis of trading results to find areas of improvement The feeling of things not moving fast enough also causes traders to add too many trading systems to an already overloaded brain and not be able to focus properly on any one strategy to make it profitable The profitability of the trading system is profoundly impacted by these types of behaviors and turns what is a money making system in theory into a loss making system in the real life The problem facing traders is that personal change can be hard and requires extensive inner work to change a person from impulsive and impatient to someone who routinely practices patience on a daily and hourly basis This little book follows the theme of the other related Trading Psychology Made Easy books and aims to give traders a new way to look at trading which will naturally increase positive trading behaviors in an

effortless way Using powerful techniques from the world of NLP Hypnosis and EFT help make lack of patience a non issue in your trading performance Get the Book Now and Start improving Your Trading Today     **How to make High Profits**
