

The background of the slide features two photographs of wallabies. The top photograph shows a wallaby with brown and grey fur lying on a patch of green grass, looking towards the left. The bottom photograph shows a wallaby with similar fur sitting on a rocky, mossy ground, also looking to the left. The text is overlaid on these images.

Hunting Dama Wallabies In New Zealand:

The Handbook of New Zealand Mammals Carolyn King, David Forsyth, 2021-01-20 The Handbook of New Zealand Mammals is the only definitive reference on all the land breeding mammals recorded in the New Zealand region including the New Zealand sector of Antarctica It lists 65 species including native and exotic wild and feral living and extinct residents vagrants and failed introductions It describes their history biology and ecology and brings together comprehensive and detailed information gathered from widely scattered or previously unpublished sources The description of each species is arranged under standardised headings for easy reference Because the only native land breeding mammals in New Zealand are bats and seals the great majority of the modern mammal fauna comprises introduced species whose arrival has had profound effects both for themselves and for the native fauna and flora The book details changes in numbers and distribution for the native species and for the arrivals it summarises changes in habitat diet numbers and size in comparison with their ancestral stocks and some of the problems they present to resource managers For this third edition the text and references have been completely updated and reorganised into Family chapters The colour section includes 14 pages of artwork showing all the species described and their main variations plus two pages of maps *Biological Invasions in New Zealand* Robert B. Allen, William G. Lee, 2006-07-04 Man s recent colonization of New Zealand has dramatically altered the resident biota and resulted in the introduction of numerous alien organisms to these once remote islands In reverse there is increasing evidence of a lesser known export of species to other regions of the world This volume presents an in depth review of the level and rate of such invasions and investigates what controls the success of invaders and the consequences for ecosystems both on land and offshore It provides invasion biologists everywhere with tests of current theories about those factors leading to the success of invaders as well as evaluating principles for understanding the nature of their impacts that form a solid basis for the effective management of biological invasions worldwide New Zealand Forestry , 1986

Hunting in New Zealand Rex Forrester, Neil Illingworth, 1967 **Carnivores of Australia** Alistair Glen, Christopher Dickman, 2014-11-05 The Australian continent provides a unique perspective on the evolution and ecology of carnivorous animals In earlier ages Australia provided the arena for a spectacular radiation of marsupial and reptilian predators The causes of their extinctions are still the subject of debate Since European settlement Australia has seen the extinction of one large marsupial predator the thylacine another the Tasmanian devil is in danger of imminent extinction and still others have suffered dramatic declines By contrast two recently introduced predators the fox and cat have been spectacularly successful with devastating impacts on the Australian fauna *Carnivores of Australia Past Present and Future* explores Australia s unique predator communities from pre historic historic and current perspectives It covers mammalian reptilian and avian carnivores both native and introduced to Australia It also examines the debate surrounding how best to manage predators to protect livestock and native biodiversity Readers will benefit from the most up to date synthesis by leading researchers and

managers in the field of carnivore biology By emphasising Australian carnivores as exemplars of flesh eaters in other parts of the world this book will be an important reference for researchers wildlife managers and students worldwide **Methods to Control and Eradicate Non-native Terrestrial Vertebrate Species** Jorge Fernández Orueta,Yolanda Ramos Aranda,Yolanda Aranda Ramos,Council of Europe,2001-01-01 Invasive alien species can upset ecosystems and are one of the main causes of species extinction While it is preferable to concentrate efforts on measures to prevent their introduction it is also possible to control their spread or eradicate them In this publication methods of control or eradication are presented and discussed *New Zealand Journal of Zoology* ,2002 *New Zealand Journal of Zoology* ,1974-03 **New Zealand Wildlife** Julian Fitter,2009 A comprehensive overview of New Zealand s natural history with details of where to go to see them along with recommended tramping tracks *Wildlife Research* ,2010
