The Holocene and Anthropocene Environmental History of Mexico Nuria Torrescano- Valle, Gerald A. Islebe, Priyadarsi D. Roy, 2019-12-02 This book provides essential information on Mexico's Holocene and Anthropocene climate and vegetation history. Considering the geography of Mexico which is home to a variety of climatic and environmental conditions from desert and tropical to high mountain climates, this book focuses on its postglacial paleoecology and paleoclimatology. Further, it analyses human intervention since the middle Holocene as a major agent of environmental change. Offering a valuable tool for understanding past climate change and its relationship with present climate change, the book is a must read for botanists, ecologists, palaeontologists and graduate students in related fields.

Encyclopedia of Exploration to 1800 Raymond John Howgego, 2003. A comprehensive reference guide to the history and literature of exploration, travel, and colonization from the earliest times to the year 1800. The vast scope of the *Encyclopedia of Exploration* makes it a work unlike any other in its combination of historical, biographical, and bibliographical data. It includes a catalogue of all known expeditions, voyages, and travels, as well as biographical information on the travellers themselves, which places them in their historical context. The *Encyclopedia of Exploration to 1800* is a massive undertaking, resulting in a work that extends to 1.2 million words in almost 1200 pages. The 2327 major articles have generated index entries totalling more than 7500 names of persons or ships mentioned in the text. Within the text itself, there are about 4000 cross references between articles. Altogether, nearly 20,000 bibliographical citations accompany the articles. A considerable quantity of information in this book is presented here for the first time in English.
