RISK ASSESSMENTS

If you operate a commercial kitchen, you will have duties under the health and safety law to assess fire risks in the operation of extract ventilation. The Risk Assessment should be conducted by a responsible person and will help you to identify potential hazards associated with kitchen extract systems.

If you employ five or more persons - within the company as opposed to a particular location, the findings and persons at special risk must be documented. For very small premises the fire risk assessment may be part of a general health & safety risk assessment.

Having conducted a Risk Assessment it is likely that your extract system will appear as a fire risk. Measures to deal with this risk must be put in place.

Capital Cleaning can clean your extract system and provide you with a certificate showing the date cleaned and next due date. This may be all that is needed to control the risk associated with the extract system.
