by **Professor Ahmed T Hadidi**

*Professor of Paediatric Surgery, Heidelberg/Mannheim University, Germany
Professor of Paediatric and Plastic Surgery, Cairo University, Egypt*

Hypospadias surgery has developed into a well defined art and science. Surgeons dealing with this anomaly should have a detailed understanding of the various basic surgical principles and experience with delicate, precise optically assisted techniques and maintain a clinical workload that is sufficient to obtain consistently good results.

Incidence

One in 300 boys has hypospadias. In the United States a study reported that hypospadias was the most common congenital anomaly among whites. The incidence has been rising during the 1970s and 1980s.

Classification

Anatomic classification of hypospadias recognizes the level of the meatus without taking into account curvature. A more recent classification was described. This classification indicates the site of urethral meatus (before and after chordee correction), the prepuce (incomplete or complete), the glans (cleft, incomplete cleft or flat), the width of urethral plate, the degree of penile rotation if present and the presence of scrotal transposition (Fig. 1, 2). Using the general classification (Fig. 4), surgeons are able to conduct multi-centre studies to evaluate different techniques of repair.

The book is organized according to anatomic region with additional chapters on hernias, tumors, lymphogenesis, and lymphatic malformations. According to WHO statistics, each year congenital anomalies result in approximately 3.2 million birth defect-related disabilities worldwide. All too often, however, training in embryology is now a neglected area, and medical graduates frequently lack confidence in their knowledge of the field. *Clinical Embryology: An Atlas of Congenital Malformations* will help to rectify this deficit and to ensure that malformations are comprehended and managed appropriately. It will be of value for postgraduate trainees in pediatric surgery, pediatrics, and neonatology; undergraduate medical students; and general practitioners/family physicians.
