State Appellate Division , **Why Ancient Objects Matter** Nicholas Cipolla, Anne F. LaGatta, Candace Weddle Livingston, Peter J.M. Schertz, Ambra Spinelli, Sarah K. Yeomans, 2025-04-21 This collection of twenty eight essays by emerging and established scholars presents work that deeply engages with the materiality and history of Greek and Roman artworks artifacts and monuments Dedicated to Prof John Pollini in honor of his contributions to the study of the ancient Mediterranean world this volume reflects the broad range of his scholarship from sculpture especially portraiture and its ancient contexts to material studies iconographic analysis and the complex ways that religious and political change both shape and are shaped by material culture The contributions assembled in this volume highlight the diverse ways in which contemporary scholars construct interpretations of visual art based on a deep understanding of the ancient world precise attention to detail and technique and rigorous research into the historical contexts of objects myths literature and iconography Through their interdisciplinary approaches the contributors offer new insights on artistic production viewer reception and social history with an emphasis on the theme of transformation as objects artworks and ideas journey through time and from one culture to another *Childhood in Ancient Athens* Lesley A. Beaumont, 2013-01-17 Childhood in Ancient Athens offers an in depth study of children during the heyday of the Athenian city state thereby illuminating a significant social group largely ignored by most ancient and modern authors alike It concentrates not only on the child s own experience but also examines the perceptions of children and childhood by Athenian society these perceptions variously exhibit both similarities and stark contrasts with those of our own 21st century Western society The study covers the juvenile life course from birth and infancy through early and later childhood and treats these life stages according to the topics of nurture play education work cult and ritual and death In view of the scant ancient Greek literary evidence pertaining to childhood Beaumont focuses on the more copious ancient visual representations of children in Athenian pot painting sculpture and terracotta modelling Notably this is the first full length monograph in English to address the iconography of childhood in

ancient Athens and it breaks important new ground by rigorously analysing and evaluating classical art to reconstruct childhood's social history. With over 120 illustrations the book provides a rich visual as well as narrative resource for the history of childhood in classical antiquity. Methods of Environmental and Social Impact Assessment Peter Morris, Riki Therivel, Graham Wood, 2017-09-13 Environmental and social impact assessment ESIA is an important and often obligatory part of proposing or launching any development project. Delivering a successful ESIA needs not only an understanding of the theory but also a detailed knowledge of the methods for carrying out the processes required. Riki Therivel and Graham Wood bring together the latest advice on best practice from experienced practitioners to ensure an ESIA is carried out effectively and efficiently. This new edition explains how an ESIA works and how it should be carried out, demonstrates the links between socio-economic, cultural, environmental and ecological systems and assessments, incorporates the World Bank's IFC performance standards and best practice examples from developing as well as developed countries, includes new chapters on emerging ESIA topics such as climate change, ecosystem services, cultural impacts, resource efficiency, land acquisition and involuntary resettlement. Invaluable to undergraduate and MSc students of ESIA, on planning, ecology, geography and environment courses, this internationally oriented fourth edition of *Methods of Environmental and Social Impact Assessment* is also of great use to planners, ESIA practitioners and professionals seeking to update their skills. *Northern Illinois University Shooting; DeKalb, Illinois*, **Illinois Register**, 2002 *Critical Archaeology in the Digital Age* Kevin Garstki, 2022-02-01 Every part of archaeological practice is intimately tied to digital technologies, but how deeply do we really understand the ways these technologies impact the theoretical trends in archaeology, how these trends affect the adoption of these technologies, or how the use of technology alters our interactions with the human past? This volume suggests a critical approach to archaeology in a digital world: a purposeful and systematic application of digital tools in archaeology. This is a call to pay attention to your digital tools, to be explicit about how you are using them, and to understand how they work and impact your own practice. The chapters in this volume demonstrate how this critical reflexive approach to archaeology in the digital age can be accomplished, touching on topics that include 3D data, predictive and procedural modelling, digital publishing, digital archiving, public and community engagement, ethics, and global sustainability. The scale and scope of this research demonstrates how necessary it is for all archaeological practitioners to approach this digital age with a critical perspective and to be purposeful in our use of digital technologies. **Corruption's Claw** Emma L. Adams, 2024-10-15 In Laria, the truth cuts as sharp as a blade. Former captain Yala Palathar and her allies prevented the god of death from claiming another city, but at a cost. Now war threatens between Laria and their rival nation of Rafragoria, after half a decade of peace and tensions in the capital are at an all-time high. While the unprepared monarch tries to keep everything under control, it seems inevitable that Yala and her surviving squad mates will be called to battle once again. To complicate matters, bodies are washing up on Laria's shores, corrupted by Mekan's insidious magic. Yala is certain that someone is trying to push their nation

into a fight that will achieve nothing but a fresh wave of souls to feed the god of death but the Disciples of the Flame are determined to burn away the evidence literally As Dalathar comes ever closer to boiling over in chaos Yala must choose whether to reveal the secrets that will either save everyone from an avoidable war or shatter the fragile peace holding Laria together *The Archaeology of Violence* Sarah Ralph, 2013-01-17 The Archaeology of Violence is an interdisciplinary consideration of the role of violence in social cultural and sociopolitical contexts The volume draws on the work of archaeologists anthropologists classicists and art historians all of whom have an interest in understanding the role of violence in their respective specialist fields in the Mediterranean and Europe The focus is on three themes contexts of violence politics and identities of violence and sanctified violence In contrast to many past studies of violence often defined by their subject specialism or by a specific temporal or geographic focus this book draws on a wide range of both temporal and spatial examples and offers new perspectives on the study of violence and its role in social and political change Rather than simply equating violence with warfare as has been done in many archaeological cases the volume contends that the focus on warfare has been to the detriment of our understanding of other forms of non warfare violence and has the potential to affect the ways in which violence is recognized and discussed by scholars and ultimately has repercussions for understanding its role in society *Resources in Education* ,1979
