Teaching and Learning Language: Current Trends and Practices (Penerbit USM) Ambigapathy Pandian,Sunny Tan Siew Bek,Shaik Abdul Malik Mohamed Ismail,2014 This book represents

a collection of papers that relate to the challenges and problems posed by the ever changing and diversified nature of today's classroom. The papers discuss and demonstrate methodologies and learning strategies and in the process recommend effective practices that are practical and open to adaptation for different teaching and learning contexts. They range from suggestions on how to exploit information technology resources to individual or specific case studies. These case studies report on a variety of contextual issues and problems that are specified to particular learning contexts. This book therefore thus not only offers examples of tried and tested teaching strategies but also offers useful insights into specific sociocultural problems that are experienced by learners as well as teachers and interested stakeholders in particular settings and countries. The papers offer a comprehensive documentation of past as well as present problems faced by teachers, policy makers and students and discuss ways and strategies of overcoming such problems such that the teaching and learning process is not only enhanced but made more meaningful and fulfilling to both teachers and learners. The inherently global perspective of the papers in this book makes it an enriching compendium.

Translation and Language Education Sara Laviosa, 2014-08-01. The revival of translation as a means of learning and teaching a foreign language and as a skill in its own right is occurring at both undergraduate and postgraduate levels in universities. In this book Sara Laviosa proposes a translation based pedagogy that is grounded in theory and has been applied in real educational contexts. This volume draws on the convergence between the view of language and translation embraced by ecologically oriented educationalists and the theoretical underpinnings of the holistic approach to translating culture. It puts forward a holistic pedagogy that harmonizes the teaching of language and translation in the same learning environment. The author examines the changing nature of the role of pedagogic translation starting with the Grammar Translation Method and concluding with the more recent ecological approaches to Foreign Language Education. Translation and Language Education analyses current research into the revival of translation in language teaching and is vital reading for translators, language teachers and postgraduate students working in the areas of Translation Studies and Applied Linguistics.
