Mobile Communication Scott Campbell, Rich Ling, 2017-09-05 Mobile Communication covers a wide range of topics These include the replacement of co present interaction with mediated contact and analysis of mobile based cohesion and gender The authors also explore the role of media choice and its effect on the quality as well as quantity of social cohesion Other topics include mobile communication and communities of interest and mobile communication cohesion and youth This volume brings together scholars from around the world to consider how mobile communication both builds and destroys our sense of social cohesion There is no question that uses of technology can lead to increased cohesion within personal communities For example this volume includes research on caravan couples in Australia factory workers in China young couples in Germany citizens in Slovenia and sports clubs in Ireland It also includes research on drunken calls between university students in the US calls of international students in Switzerland and communications between immigrant women in Melbourne Australia However the contributors also argue that as social networks become inundated with mobile communication users these users may become increasingly isolated and social division can ensue

Handbook of Research on Digital Media and Advertising: User Generated Content Consumption Eastin, Matthew S., Daugherty, Terry, Burns, Neal M., 2010-07-31 This book bridges the gap between professional and academic perceptions of advertising in new media environments defining the evolution of consumerism within the context of media change and establishing the practical issues related to consumer power shifts from supplier to user Provided by publisher

Mobile Communication Rich Ling, Jonathan Donner, 2013-05-03 With staggering swiftness the mobile phone has become a fixture of daily life in almost every society on earth In 2007 the world had over 3 billion mobile subscriptions Prosperous nations boast of having more subscriptions than people In the developing world

hundreds of millions of people who could never afford a landline telephone now have a mobile number of their own With a mobile in our hand many of us feel safer more productive and more connected to loved ones but perhaps also more distracted and less involved with things happening immediately around us Written by two leading researchers in the field this volume presents an overview of the mobile telephone as a social and cultural phenomenon Research is summarized and made accessible though detailed descriptions of ten mobile users from around the world These illustrate popular debates as well as deeper social forces at work The book concludes by considering three themes 1 the tighter interlacing of daily activities 2 a revolution of control in the social sphere and 3 the arrival of a world where the majority of its inhabitants are reachable anytime anywhere

Promoting Democracy Abroad Peter Burnell, 2017-09-08 Promoting democracy has grown from a small little known activity to a high profile endeavor It now involves academia think tanks and the popular media The number of countries and organizations inter governmental non governmental as well as governmental involved in supporting the spread of democracy is now legion Countries touched by these efforts include a majority of all the world's states and some independent territories that are not yet fully sovereign The definitional boundaries between promoting democracy and international advocacy and defense of human rights and good governance are not precise Similarly the concept of promoting democracy itself is not uniformly accepted It has become a slogan that attracts both fervent support and grave condemnation For Burnell promoting democracy refers to a wide range of non coercive attempts to spread democracy abroad for whatever reason At its heart it is political intervention in the domestic affairs of other countries that seeks to affect the distribution of power whether by patient and non violent involvement or more urgent action democracy assistance projects form a core activity Burnell holds that participation in the democracy assistance industry will continue to grow However the industry's progress up until now has in part been contingent on the progress of democratization itself The slowdown that is currently happening in the advance of freedom and democracy around the world and the strength shown by leading authoritarian or semi authoritarian regimes must raise questions about the outlook for democracy promotion If democracy promotion and assistance are to be fit for the future then the need for a broadly based appropriately contextualized examination of the policy and the performance is greater now than at any time in the past

Personal Connections in the Digital Age Nancy K. Baym, 2015-08-04 The internet and the mobile phone have disrupted many of our conventional understandings of ourselves and our relationships raising anxieties and hopes about their effects on our lives In this second edition of her timely and vibrant book Nancy Baym provides frameworks for thinking critically about the roles of digital media in personal relationships Rather than providing exuberant accounts or cautionary tales it offers a data grounded primer on how to make sense of these important changes in relational life Fully updated to reflect new developments in technology and digital scholarship the book identifies the core relational issues these media disturb and shows how our talk about them echoes historical discussions about earlier communication technologies Chapters explore how we use mediated language and

nonverbal behavior to develop and maintain communities social networks and new relationships and to maintain existing relationships in our everyday lives The book combines research findings with lively examples to address questions such as Can mediated interaction be warm and personal Are people honest about themselves online Can relationships that start online work Do digital media damage the other relationships in our lives Throughout the book argues that these questions must be answered with firm understandings of media qualities and the social and personal contexts in which they are developed and used This new edition of *Personal Connections in the Digital Age* will be required reading for all students and scholars of media communication studies and sociology as well as all those who want a richer understanding of digital media and everyday life

Navigating New Media Networks Bree McEwan, 2015-08-13 *Navigating New Media Networks* examines the changes introduced into society through the increasing use of communication technology The development of a networked society has allowed individuals to acquire the social resources and support needed to thrive in the modern world but it has also placed great pressure on the individual to conduct the communication work needed to form and maintain relationships McEwan explores this issue by delving into topics like identity privacy communication competence online communities online social support mediated relational maintenance and mobile communication This work will be of interest to scholars of sociology psychology and communication

Designing for Zero Waste Steffen Lehmann, Robert Crocker, 2013-07-03 *Designing for Zero Waste* is a timely topical and necessary publication Materials and resources are being depleted at an accelerating speed and rising consumption trends across the globe have placed material efficiency waste reduction and recycling at the centre of many government policy agendas giving them an unprecedented urgency While there has been a considerable literature addressing consumption and waste reduction from different disciplinary perspectives the complex nature of the problem requires an increasing degree of interdisciplinarity Resource recovery and the optimisation of material flow can only be achieved alongside and through behaviour change to reduce the creation of material waste and wasteful consumption This book aims to develop a more robust understanding of the links between lifestyle consumption technologies and urban development

Location Technologies in International Context Rowan Wilken, Gerard Goggin, Heather Horst, 2019-01-21 *Location Technologies in International Context* offers the first international account of location technologies in an expanded sense and brings together a range of contributions on these technologies and their various cultures of use within the Global South This collection asks How within the Global South do location technologies differ across national markets geo linguistic communities and cultural contexts What are the contrasting or shared meanings and practices associated with location technologies And what innovative practices and new or reinvigorated theory may emerge from attention to the Global South In exploring these questions the collection contributes to our understanding of social cultural gendered and political relations on a global and local scale *Location Technologies in International Context* is ideal for a range of disciplines including cultural communication and media studies anthropology sociology and geography
