Forced Out Kevin Maxwell, 2020-07-05 A gay black British police officer s memoir of prejudice racism and homophobia on the force in the twenty first century Kevin Maxwell was a dream candidate for the police force he had a long held desire to

serve his community a strong moral compass and a clear aptitude for both the strategic and practical aspects of policing And as a gay black man from a working class family he could easily have been a poster boy for the force s stated commitment to equal opportunities Joining just after the 9 11 attacks Kevin entered policing determined to keep communities safe in the face of a changing world But instead he came up against entrenched prejudice open racism and homophobia For more than ten years Kevin strove against the odds until he took the force to an employment tribunal with devastating results Forced Out is a revelatory expos combining deeply affecting memoir with sharp analysis and a fascinating insider perspective on day to day life in the force It is a touchstone for the silent many who have either tried to ignore abuse for the sake of their career or who have been bullied out of their jobs It paints a sobering portrait of an institution that has not yet learned the lessons of the past and whose prejudice is informing the cases it chooses to investigate and the way it investigates them And it asks the important question what needs to change One of the most compulsive books I ve read in a long while Bernadine Evaristo award winning author of Girl Woman Other *Textbook of Palliative Care Communication* Elaine Wittenberg, Betty R. Embodying Gender and Age in Speculative Fiction Derek J. Thiess,2015-10-14 Following scholarship on gender in science fiction this book explores the limits of considering age as a social construction positing that an acknowledgement of aged bodies necessarily changes the way we read both age and science fiction The volume employs contemporary clinical psychology the biopsychosocial model to demonstrate that age is an important and neglected topic relevant to the study of speculative fiction While gender offers a vocabulary the biopsychosocial approach provides a method to consider age and gender as an embodied synthesis of physicality psychology and social environment This respected model of clinical psychology allows a unique and innovative lens through which to read age and the body in literature Thiess offers readings of established sf classics including Octavia Butler s Parable series Orson Scott Card s Ender s Game and cyberpunk authors such as Bruce Sterling Pat Cadigan and Neal Stephenson also exploring more mainstream speculative works including Stephanie Meyer s Twilight series and Joss Whedon s Firefly Serenity Visiting topics such as care work sexuality sport and the military in these works the book demonstrates that acknowledging a more fully embodied age is not only necessary for the individual subject but will also enrich our understanding of other social categories including gender and race Taking a constructive rather than adversarial stance this book does not merely question how much one can ethically and responsibly bend age but suggests there is a great

deal to learn when one explores those limits
