**Vocationalizing Education** Sweden. Styrelsen för internationell utveckling,1988 Vocationalization of secondary education is taken to mean curriculum change in a practical or vocational direction Vocationalization is a trend which transcends the divide between rich and poor countries and between different political systems This volume illustrates the international importance of the theme Part I deals with the views and expectations relating to the process of vocationalization Part II is concerned with the process of policy formulation and the conditions impinging on that process Part III addresses select issues in policy implementation and describes more broadly how vocationalization policies have been implemented throughout the education system of various countries Finally Part IV discusses the results of a number of empirical evaluation studies      *Resources in Education* ,1996      *Educational Leadership in Becoming* Nuraan Davids,Yusef Waghid,2016-08-25 Educational Leadership in Becoming reconsiders educational leadership in its current forms and presents a more plausible form of educational leadership to contend with the complexities currently found in universities and schools Much of the literature in vogue concerning educational leadership ranges from transactional to transformative representations of the concept in relation to educational management and policy curriculum inquiry and pedagogical action The primary aim of this book is to revisit some of the dominant understandings of educational leadership and to offer an extended view of the practice along the lines of potentiality and becoming Davids and Waghid argue that all current forms of educational leadership are insufficient to enact responsible human action particularly when it comes to addressing the combined issues of globalisation and equitable redress and transformation whether in relation to leading schools or universities The primary objective of the book is to draw on the Agambian notion of becoming in order to show that an educational leadership in becoming is better placed to not only address the myriad challenges besetting education but to also enhance the potential of leadership in action The book addresses an international audience by analysing conceptions of transformative leadership and should be read by anyone who is interested in education and educational leadership as well as the impact of neoliberal agendas on education and society It should also appeal to those interested in the philosophy of education      Citizenship Education in Asia and the Pacific W.O. Lee,David L. Grossman,Kerry J. Kennedy,Gregory P. Fairbrother,2013-11-11 It is a great pleasure to present this book edited by a distinguished team at the Hong Kong Institute of Education and with excellent contributors from nine countries in the region and beyond The book is a truly comparative work which significantly advances conceptual understanding The comparisons undertaken are at many levels and with

different units for analysis One chapter undertakes comparison in two cities Hong Kong and Guangzhou three chapters make comparisons between two countries South Korea and Singapore Solomon Islands and Vanuatu South Korea and China and five chapters undertake comparisons across the whole region Other on individual countries or in one case on a single school In addition chapters focus several chapters examine the attitudes and roles played by individuals and groups within societies The book is thus an admirable example of the vitality of the field of comparative education in selecting different units for analysis and in examination of issues from diverse angles Within the book moreover readers will find a fascinating array of settings and environments On the one hand for example is Japan with its relatively homogenous culture a population of 126 million and a strong national identity based on language and history On the other hand is Solomon Islands which has a population of just 400 000 scattered over 1 000 islands approximately 90 indigenous languages and major social problems arising from culture clashes economic forces political dynamics and legacies of colonialism
