Life Orientation Exam 2014:

Gen Z Around the World Corey Seemiller, Meghan Grace, 2024-01-15 *Gen Z Around the World* incorporates research from eighty one countries to provide a holistic view of Generation Z The researchers present chapters on everything ranging from communication happiness and learning styles to emotional wellbeing career values and social change The Global Testing Culture William C. Smith, 2016-01-04 The past thirty years have seen a rapid expansion of testing exposing students worldwide to tests that are now more than ever standardized and linked to high stakes outcomes The use of testing as a policy tool has been legitimized within international educational development to measure education quality in the vast majority of countries worldwide The embedded nature and normative power of high stakes standardized testing across national contexts can be understood as a global testing culture The global testing culture permeates all aspects of education from financing to parental involvement to teacher and student beliefs and practices The reinforcing nature of the global testing culture leads to an environment where testing becomes synonymous with accountability which becomes synonymous with education quality Underlying the global testing culture is a set of values identified from the increasing literature on world culture These include education as a human right academic intelligence faith in science decentralization and neoliberalism Each of these values highlights different aspects of the dialogue in support of high stakes standardized testing The wide approval of these values and their ability to legitimate various aspects of high stakes testing reinforces the taken for granted notion that such tests are effective and appropriate education practices However a large body of literature emphasizes the negative unintended consequences teaching to the test reshaping the testing pool the inequitable distribution of school resources and teachers attention and reconstructing the role of the student teacher and parent commonly found when standardized census based tests are combined with high stakes outcomes for educators or students This book problematizes this culture by providing critical perspectives that challenge the assumptions of the culture and describe how the culture manifests in national contexts The volume makes it clear that testing per se is not the problem Instead it is how tests are administered used or misused and linked to accountability that provide the global testing culture with its powerful ability to shape schools and society and lead to its unintended undesirable consequences Personal Hygiene Practices of Elderly Among Lambani Community Dr. Arunkumar Jadhav, 2018-08-03 The concept of Elderly is a normal inevitable and universal phenomenon in the life of every individual irrespective of caste gender race ethnicity society or culture The individual who has born on this earth has to grow and become old during some point of his life Elderly period or phase is a multidimensional phenomenon which includes the changes in the various aspects of human life like biological psychological and sociological And elderly old age is a critical phase in the life of individual as much as similar to childhood or adolescence **The Consequences of COVID-19 on the Mental Health of Students** Haibo Yang, Li Wang, Chang Liu, 2022-08-29 **Resilience** Steven M. Southwick, Dennis S. Charney, 2018-05-03 Most of us at some point in our lives will be struck by

major traumas such as the sudden death of a loved one a debilitating disease assault or a natural disaster Resilience refers to the ability to bounce back after encountering difficulty This book provides a guide to building emotional mental and physical resilience by presenting ten factors to help anyone become more resilient to life s challenges Specific resilience factors such as facing fear optimism and social support are described through the experiences and personal reflections of highly resilient survivors These survivors also describe real life methods for practicing and benefiting from the resilience factors As resilience is the complex product of genetic psychological biological social and spiritual factors the authors investigate resilience from multiple scientific perspectives They synthesize the latest literature on the topic describe their own research on resilience and quote from their interviews with highly resilient people

Research on Emotion and Learning: Contributions from Latin America Camilo Hurtado-Parrado, Carlos Gantiva, Leonardo A. Ortega, Alexander Gómez-A, Lucas Cuenya, Javier Leonardo Rico, 2020-05-11 Latin America has increased its share of world scientific publications by nearly twofold during the last two decades approximately from 2 to 4% Despite this positive trend the scholarly impact of scientific research produced in the region measured in terms of citation rate remains low Two interrelated factors that contribute to this situation is that most research groups tend to work in isolation or in local sporadic collaboration and results are often published in journals that are not indexed in major citation databases e g SCOPUS or Web of Science Ultimately part of Latin American high quality research seems to remain hidden from the rest of the world Over the last decades an important number of Latin American scientists have developed fruitful research agendas on questions on learning and emotion focusing on basic and or translational research with humans and other animal models and implementing diverse methodologies Notwithstanding the important contributions of these research programs Latin American research on emotion and learning has followed the overall trend of other research fields throughout the region namely remaining partially hidden from the large scientific community of the world This Research Topic aimed to engage researchers from Latin America to share their empirical and conceptual work on learning and emotion Ultimately this effort was expected to strengthen and integrate our regional community of experts enhance global networking and establish new challenges and developments for future investigation
