diversos especialistas nacionales e internacionales en materias conectadas con las energías renovables en general o la energía eólica en particular. El importante desarrollo e implementación de este último tipo de energía y los problemas y conflictos que ocasiona, así como los beneficios y ventajas que justifican su fomento, han motivado su tratamiento específico desde la perspectiva del Derecho. La obra se estructura en cuatro partes. Una parte introductoria dedicada al análisis de la regulación de las energías renovables en general y su justificación basada fundamentalmente en el Cambio Climático. La siguiente se centra ya en cinco aspectos destacables o interesantes del objeto específico de este trabajo: la naturaleza jurídica de la energía eólica; los procedimientos de autorización de los parques eólicos; la gestión integrada del litoral en relación con los parques eólicos que se ubican en esa zona; la intervención local en la implantación de parques eólicos y la coordinación de los procedimientos de autorización; acceso a la red y reconocimiento del régimen especial. La tercera parte trata un tema de carácter ambiental, probablemente el de mayor interés y trascendencia para la instalación en el territorio de los parques eólicos: el de la protección del paisaje. Por último, la cuarta parte se destina a presentar tres visiones comparadas de la regulación de la energía eólica de los dos países con mayor potencia eólica instalada: Alemania y Estados Unidos, aunque con esquemas de apoyo público bien diferentes y de otros países: Japón, que no destaca tanto en ese aspecto, pero que a diferencia de EE.UU. ha firmado y ratificado el Protocolo de Kyoto y por consiguiente está adoptando medidas en consecuencia. Esta publicación va dirigida especialmente a los agentes públicos y privados relacionados con los procesos de desarrollo e implantación de la energía eólica desde el momento de su regulación normativa hasta el de su efectivo aprovechamiento mediante la instalación de los parques eólicos. También puede satisfacer la curiosidad o las inquietudes de personas ambientalmente conscientes o comprometidas que quieran estar al corriente de la situación jurídica, los pros y contras, la problemática en general de la energía eólica y de las instalaciones para su aprovechamiento y su relación con el Cambio Climático.
