It offers a revealing look at how events, people, and institutions are shaped by currents that sometimes reach back hundreds of years. The book covers the complex history of the diverse societies and economies of Iran against the background of dynastic changes, revolutions, civil wars, foreign occupation, and the rise of the Islamic Republic. Abbas Amanat combines chronological and thematic approaches, exploring events with lasting implications for modern Iran and the world. Drawing on diverse historical scholarship and emphasizing the twentieth century, he addresses debates about Iran's culture and politics. Political history is the driving narrative force, given impetus by Amanat's decades of research and study. He layers the book with discussions of literature, music, and the arts, ideology and religion, economy and society, and cultural identity and heritage.

Coastal Wetlands Gerardo Perillo, Eric Wolanski, Donald R. Cahoon, Charles S. Hopkins, 2018-11-02 Coastal Wetlands, Second Edition: An Integrated and Ecosystem Approach provides an understanding of the functioning of coastal ecosystems and the ecological services that they provide. As coastal wetlands are under a great deal of pressure from the dual forces of rising sea levels and the intervention of human populations both along the estuary and in the river catchment, this book covers important issues such as the destruction or degradation of wetlands from land reclamation and infrastructure impacts, from the discharge of pollutants, changes in river flows, and sediment supplies, land clearing, and dam operations. It covers climate change and its influence on coastal wetland form and function. Provides a fully updated and expanded resource including new chapters on modeling, management, and the impact of climate change. Contains full color figures of wetlands and estuaries in different parts of the world.

Mangrove Ecosystems: A Global Biogeographic Perspective Victor H. Rivera-Monroy, Shing Yip Lee, Erik Kristensen, Robert R. Twilley, 2017-11-03 This book presents a comprehensive overview and analysis of mangrove ecological processes, structure, and function at the local, biogeographic, and global scales, and how these properties interact to provide key ecosystem services to society. The analysis is based on an international collaborative effort that focuses on regions and countries holding the largest mangrove resources and encompasses the major biogeographic and socio-economic settings of mangrove distribution. Given the economic and ecological importance of mangrove wetlands at the global scale, the chapters aim to integrate ecological and socio-economic perspectives on mangrove function and management using a system-level hierarchical analysis framework. The book explores the nexus between mangrove ecology and the capacity for ecosystem services with an emphasis on thresholds, multiple stressors, and local conditions that determine this capacity. The interdisciplinary approach and illustrative study cases included in the book will provide valuable resources in data, information, and knowledge about the current status of one of the most productive coastal ecosystems in the world.
